The European Organ 1450 185:

The European Organ, 1450-1850 Peter Williams, 1966 No complete book in English or indeed in any other language has hitherto been available on the immense subject of the European organ certainly not one covering each area and period in full historical detail From a few English and a very large number of German French Italian and other sources Dr Williams has drawn a history of this most complex and magnificent of all instruments He has himself visited many of the places concerned and has included references to English organ building where these are relevant Suggestions in reference notes for further information are aimed at professional readers while for the more general reader there are many notes in the text about actual instruments he can visit or hear abroad In the chapters devoted to the seven main areas authentic registration rules perhaps the most complete collection so far made have been incorporated and there is constant reference to the theorists and composers of the time and area under consideration An introduction sketches the construction of the organ a glossary of stop names offers results of some of the most up to date research and 100 photographs with a unique feature seven maps fill in the gazetteer aspect of the subject Particular importance is attached to describing the splendid work of the best known builders the evolution of the Renaissance from the Gothic organ and the signs of decline in the 1750 1850 period For some areas notably Spain and the western Slav countries the book draws for the first time in English the main lines of development and at the same time suggests evaluations as to the important and the unimportant in the history of all the European organs

Religion, Technology, and the Great and Little Divergences Karel Davids, 2012-11-09 In *Religion Technology and the Great and Little Divergences* Karel Davids offers a new perspective on technological change in China and Europe before the Industrial Revolution This book makes an innovative contribution to current debates on the origins of the Great Divergence between China and Europe and the Little Divergence within Europe by analysing the relationship between the evolution of technical knowledge and religious contexts It deals with the question to what extent disparities in the evolution of technical knowledge can be explained by differences in religious environment It takes a comparative look at the relation between technology and religion in China and Europe between c 700 and 1800 from four angles visions on the uses of nature the formation of human capital the circulation of technical knowledge and technical innovation

An Analysis and Performing Edition of a Dialogue by Louis Marchand Bernard Lawrence King, 1976 *The Performance of Italian*

Basso Continuo Giulia Nuti, 2017-07-05 Basso continuo accompaniment calls upon a complex tapestry of harmonic rhythmic compositional analytical and improvisational skills The evolving knowledge that underpinned the performance of basso continuo was built up and transmitted from the late 1500s to the second half of the eighteenth century when changes in instruments together with the assertion of control by composers over their works brought about its demise By tracing the development of basso continuo over time and across the regions of Italy where differing practices emerged Giulia Nuti accesses this body of musical usage Sources include the music itself introductions and specific instructions and requirements in song books and operas contemporary accounts of performances and in the later period of basso continuo description and instruction offered in theoretical treatises Changes in instruments and instrumental usage and the resulting sounds available to composers and performers are considered as well as the altering relationship between the improvising continuo player and the composer Extensive documentation from both manuscript and printed sources some very rare and others better known in the original language followed by a precise English translation is offered in support of the arguments There are also many musical examples transcribed and in facsimile Giulia Nuti provides both a scholarly account of the history of basso continuo and a performance driven interpretation of how this music might be played

Devotional Music in the Iberian World, 1450-1800 Tess Knighton, 2017-07-05 From the fifteenth century to the beginning of the nineteenth century devotional music played a fundamental role in the Iberian world Songs in the vernacular usually referred to by the generic name of villancico but including forms as varied as madrigals ensaladas tonos cantatas or even oratorios were regularly performed at many religious feasts in major churches royal and private chapels convents and in monasteries These compositions appear to have progressively fulfilled or supplemented the role occupied by the Latin motet in other countries and as they were often composed anew for each celebration the surviving sources vastly outnumber those of Latin compositions they can be counted in tens of thousands The close relationship with secular genres both musical literary and performative turned these compositions into a major vehicle for dissemination of vernacular styles throughout the Iberian world This model of musical production was also cultivated in Portugal and rapidly exported to the Spanish and Portuguese colonies in America and Asia In many cases the villancico repertory represents the oldest surviving source of music produced in these regions thus affording it a primary role in the construction of national identities The sixteen essays in this volume explore the development of devotional music in the Iberian world in this period providing the first broad based survey of this important genre
