The Road to a United Europe Ann-Christina L. Knudsen, 2009 Papers from the Second International RICHIE Conference held in Copenhagen Denmark in December 2006

The Question of Europe Peter Gowan, Perry Anderson, 1997-06-17 The Question of Europe comprises essays by some of the leading authorities and commentators on Europe addressing issues such as EU expansion Maastricht convergence criteria democratic accountability and issues of federalism

Secession from a Member State and Withdrawal from the European Union Carlos Closa, 2017-09-07 This is the first book to jointly scrutinise two existential issues for the EU withdrawal of a member state i.e. Brexit and territorial secession affecting Scotland Catalonia and beyond The book applies normative and empirical analyses explores new approaches and discusses the deep theoretical problems unleashed by these processes Featuring a superb constellation of legal and political science scholars the book combines specific legal analysis and considers the political dynamics behind the processes It provides extensive coverage and sophisticated analysis of the interpretation of Article 50

and the possible consequences it may have The implications of withdrawal and secession on EU citizenship are discussed in depth and there is an overview of the evolving nature of the relationship between the regions and the EU Finally there is an engaging normative discussion on the deeper meaning of these two processes with respect to the objective of European integration The European Union Clive Archer,2008-03-25 While there are many textbooks about the European Union EU Clive Archer covers the essential elements of the EU clearly and concisely outlining the key debates and issues it faces today

Between Governing and Governance Poul F Kjaer,2010-02-05 This book explains the emergence and functioning of three forms of governance structures within the context of the European integration and constitutionalisation process comitology regulatory agencies and the Open Method of Co ordination The point of departure is the insight that the intergovernmental supranational distinction which most theories of European integration and constitutionalisation rely on has lost its strength A new paradigm of EU research is therefore needed Against this background it is suggested that the distinction between governing and governance provides a more appropriate basis for analysing the phenomenon of integration and constitutionalisation in Europe The distinction between governing and governance allows for an understanding of the EU as a hybrid consisting of a governing dimension characterised by legal and organisational hierarchy and a governance dimension which operates within a network form characterised by legal and organisational heterarchy The function of governance structures is to ensure the embeddedness of the governing dimension in the wider society Instead of representing contradictory developments the two dimensions are therefore mutually constitutive in the sense that more governing implies more governance and vice versa These theoretical insights are illustrated through two detailed case studies which respectively reconstruct the operational mode of the Open Method of Coordination within EU Research Development Policy and the regulatory system for the EU chemicals market REACH The book is inter disciplinary in nature and incorporates insights from law political science and sociology A Converging Post-War European Discourse Thomas C.

Hoerber,2014-12-24 This book explores the most important components and contributing factors to the European integration process during the 1950s It seeks to combine comparative politics and political history to examine core themes such as war experience national security military security economic security societal security and research and education in three major European countries i e France Germany and Britain It analyses the references to the ensuing European integration process in national parliamentary debates analyzing which national needs were thought European integration could cater to but also which national positions were seen as being compromised by a closer European commitment The development of a national position on European integration and in turn the evolution of European concepts are considered by using discourse theory on parliamentary debates in France Germany and Britain Parliamentary discourses are shown to be an ideal source for analyzing grand themes such as European integration because they cover all fundamental ideas they have to be public and open ended deliberations which in turn determined the position of each country towards European integration The great

variety of positions reflected in the parliamentary discourse in particular those which did not prevail and which did not find their way into the commonly accepted historical storyline of European integration provide a greater comprehensiveness and a better understanding of the history of the European integration process
