

The background of the book cover is a monochromatic blue illustration. The upper half depicts an underwater scene with a large, long-necked marine animal, possibly a plesiosaur, swimming towards the right. Several smaller fish are scattered around it. The lower half shows a close-up of a shark's head, focusing on its eyes and the top of its snout, swimming towards the left.

The Evolution Of Communication Systems A Comparative Approach:

Evolution of Communication Systems D. Kimbrough Oller, Ulrike Griebel, 2004 Using a comparative approach in order to understand the origins of communication this title explores the mysterious circumstances that surround the emergence of human languages as well as the methods that other species use in order to communicate

The Timeliness of George Herbert Mead Hans Joas, Daniel R. Huebner, 2016-10-17 George Herbert Mead is widely considered one of the most influential American philosophers of the twentieth century and his work remains vibrant and relevant to many areas of scholarly inquiry today *The Timeliness of George Herbert Mead* brings together a range of scholars who provide detailed analyses of Mead's importance to innovative fields of scholarship including cognitive science environmental studies democratic epistemology and social ethics non teleological historiography and the history of the natural and social sciences Edited by well respected Mead scholars Hans Joas and Daniel R Huebner the volume as a whole makes a coherent statement that places Mead in dialogue with current research pushing these domains of scholarship forward while also revitalizing the growing literature on an author who has an ongoing and major influence on sociology psychology and philosophy

Handbook of Evolutionary Thinking in the Sciences Thomas Heams, Philippe Huneman, Guillaume Lecointre, Marc Silberstein, 2014-11-23 The Darwinian theory of evolution is itself evolving and this book presents the details of the core of modern Darwinism and its latest developmental directions The authors present current scientific work addressing theoretical problems and challenges in four sections beginning with the concepts of evolution theory its processes of variation heredity selection adaptation and function and its patterns of character species descent and life The second part of this book scrutinizes Darwinism in the philosophy of science and its usefulness in understanding ecosystems whilst the third section deals with its application in disciplines beyond the biological sciences including evolutionary psychology and evolutionary economics Darwinian morality and phylolinguistics The final section addresses anti Darwinism the creationist view and issues around teaching evolution in secondary schools The reader learns how current experimental biology is opening important perspectives on the sources of variation and thus of the very power of natural selection This work examines numerous examples of the extension of the principle of natural selection and provides the opportunity to critically reflect on a rich theory on the methodological rigour that presides in its extensions and exportations and on the necessity to measure its advantages and also its limits Scholars interested in modern Darwinism and scientific research its concepts research programs and controversies will find this book an excellent read and those considering how Darwinism might evolve how it can apply to the human sciences and other disciplines beyond its origins will find it particularly valuable Originally produced in French *Les Mondes Darwiniens* the scope and usefulness of the book have led to the production of this English text to reach a wider audience This book is a milestone in the impressive penetration by Francophone scholars into the world of Darwinian science its historiography and philosophy over the last two decades Alex Rosenberg R Taylor Cole Professor of

Philosophy Duke University Until now this useful and comprehensive handbook has only been available to francophones Thanks to this invaluable new translation this collection of insightful and original essays can reach the global audience it deserves Tim Lewens University of Cambridge

Origins of Language Sverker Johansson, 2005-02-17 Sverker Johansson has written an unusual book on language origins with its emphasis on empirical evidence rather than theory building This is a book for the student or researcher who prefers solid data and well supported conclusions over speculative scenarios Much that has been written on the origins of language is characterized by hypothesizing largely unconstrained by evidence But empirical data do exist and the purpose of this book is to integrate and review the available evidence from all relevant disciplines not only linguistics but also e g neurology primatology paleoanthropology and evolutionary biology The evidence is then used to constrain the multitude of scenarios for language origins demonstrating that many popular hypotheses are untenable Among the issues covered 1 Human evolutionary history 2 Anatomical prerequisites for language 3 Animal communication and ape language 4 Mind and language 5 The role of gesture 6 Innateness 7 Selective advantage of language 8 Proto language
