The Great Urals James R. Harris, 2018-10-18 Political histories of the Soviet Union have portrayed a powerful Kremlin leadership whose will was

passively implemented by regional Party officials and institutions Drawing on his research in recently opened archives in Moscow and the Urals a vast territory that is a vital center of the Russian mining and metallurgy industries James R Harris overturns this view He argues here that the regions have for centuries had strong identities and interests and that they cumulatively exerted a significant influence on Soviet policy making and on the evolution of the Soviet system After tracing the development of local interests prior to the Revolution Harris demonstrates that a desperate need for capital investment caused the Urals and other Soviet regions to press Moscow to increase the investment and production targets of the first five year plan He provides conclusive evidence that local leaders established the pace for carrying out such radical policies as breakneck industrialization and the construction of forced labor camps When the production targets could not be met regional officials falsified data and blamed saboteurs for their shortfalls Harris argues that such deception contributed to the personal and suspicious nature of Stalin s rule and to the beginning of his onslaught on the Party apparatus Most of the region s communist leaders were executed during the Great Terror of 1936 38 In his conclusion Harris measures the impact of their interests on the collapse of the communist system and the fate of reform under Gorbachev and Yeltsin

The Communist Party in Post-Soviet Russia Luke March, 2002 This pioneering analysis uses the results from the first ever Irish election study to provide a comprehensive survey of the motives outlook and behaviour of voters in the Republic of Ireland Building on the foundations laid down by previous work on comparative electoral behaviour it explores long term influences on vote choice such as party loyalties and enduring values as well as short term ones such as the economy the party leaders and the candidates themselves It also examines how people use their vote and why so many people do not vote at all Many features of Irish elections make such a detailed study particularly important The single transferable vote system allows voters an unusual degree of freedom to pick the candidates they prefer while electoral trends observed elsewhere can be found in a more extreme form in Ireland For example attachment to parties is very low differences between them are often obscure candidate profiles are very high and turnout is falling rapidly However Irish elections defy international trends in other respects most notably in the degree of personal contact parties and candidates make with their voters Findings are presented in a manner that is highly accessible to anyone with an interest in elections electoral systems and electoral behaviour The book is essential reading for anyone interested in Irish politics and is an important text for students of European Politics Parties and Elections Comparative Politics and Political Sociology
