The Experiment:

The Experiment in the History of Economics Philippe Fontaine, Robert Leonard, 2005-07-12 Throughout the history of economic ideas it has often been asserted that experimentation is impossible yet in fact history shows that the idea of experimentation has always been important and as such has been interpreted and put to use in many ways Rich in historical detail the essays in this topical volume deal with such issues as laboratory experimentation the observed transition from a post war economics to a contemporary discipline the contrasting positions of Friedrich Hayek and Oskar Morgenstern the socio economic experiments proposed by Ernest Solvay and Knut Wicksell and a rigorous examination of the way in which economic models can or cannot be construed as valid experiments producing useful knowledge A testament to the variety of ways in which experimentation has been of importance in the creation of economic knowledge these wide ranging essays will interest those seeking to expand their historical understanding of the discipline be they theorists historians philosophers advanced students or researchers *The Experiment* John Darnton, 2000-08-01 More information to be announced soon on this forthcoming title from Penguin USA **Trustworthy Online Controlled Experiments** Ron Kohavi, Diane Tang, Ya Xu, 2020-02-14 This practical guide for students researchers and practitioners offers real world guidance for data driven decision making and innovation **SOFSEM 2021: Theory and Practice of Computer Science** Tomáš Bureš, Riccardo Dondi, Johann Gamper, Giovanna Guerrini, Tomasz Jurdziński, Claus Pahl, Florian Sikora, Prudence W.H.
