Truth Pascal Engel, 2014-12-18 In this critical introduction to contemporary philosophical issues in the theory of truth Pascal Engel provides clear and authoritative exposition of recent and current ideas while providing original perspectives that advances discussion of the key issues This book begins with a presentation of the classical conceptions of truth the correspondence theory the coherence theory and verificationist and pragmatist accounts before examining so called minimalist and deflationist conceptions that deny truth can be anything more than a thin concept holding no metaphysical weight The debates between those who favour substantive conceptions of the classical kind and those who advocate minimalist and deflationist conceptions are explored Engel argues that although the minimalist conception of truth is basically right it does not follow that truth can be eliminated from our philosophical thinking as some upholders of radical deflationist views have claimed Questions about truth and realism are examined and the author shows how the realism anti realism debate remains a genuine meaningful issue for a theory of truth and has not been undermined by deflationist views Even if a metaphysical substantive theory of truth has little chance to succeed Engel concludes truth can keep a central role within our thinking as a norm or guiding value of our rational inquiries and practices in the philosophy of knowledge and in ethics

Victim Healing and Truth Commissions Holly L. Guthrey, 2015-02-23 This book intends to contribute to the growing body of transitional justice literature by providing insight into how truth commissions may be beneficial to victims of mass violence based on data collected in Timor Leste and on the Solomon Islands Drawing on literature in the fields of victim psychology procedural justice and transitional justice this study is guided by the puzzle of why truth telling in post conflict settings has been found to be both helpful and harmful to victims of mass violence Existing studies have identified a range of positive benefits and negative consequences of truth telling for victims however the reasons why some victims experience a

sense of healing while others do not after participating in post conflict truth commission processes continues to remain unclear Hence to address one piece of this complex puzzle this book seeks to begin clarifying how truth telling may be beneficial for victims by investigating the question What pathways lead from truth telling to victim healing in post conflict settings Building on the proposition that having voice a key component of procedural justice can help individuals to overcome the disempowerment and marginalisation of victimisation this book investigates voice as a causal mechanism that can create pathways toward healing within truth commission public hearings Comparative empirical studies that investigate how truth telling contributes to victim healing in post conflict settings are scarce in the field of transitional justice This book begins to fill an important gap in the existing body of literature From a practical standpoint by enhancing understanding of how truth commissions can promote healing the findings and arguments in this volume provide insight into how the design of transitional justice processes may be improved in the future to better respond to the needs of victims of mass violence
