The Heat Steelworker Lives Legends:

Critical Approaches to American Working-Class Literature Michelle Tokarczyk, 2012-03-29 *Critical Approaches to American Working Class Literature* is the first anthology to focus on literary criticism of working class American literature. The literature examined is from the 1850s to the present and includes work in several genres. Several prominent scholars have contributed and emerging scholars are represented as well.

The Heat Jimmy Santiago Baca, Stacy James, 2001 A collection of short stories written by steelworkers under the guidance of award winning poet Jimmy Santiago Baca. These voices of the working class describe what it's like to spend a lifetime in the shadow of America's steel mills. *The Heat* offers a rare last glimpse inside the huge old abandoned plants that now litter the rust belt landscape.

Steel Closets Anne Balay, 2014-04-07 Even as substantial legal and social victories are being celebrated within the gay rights movement, much of working class America still exists outside the current narratives of gay liberation. In *Steel Closets*, Anne Balay draws on oral history interviews with forty gay, lesbian, and transgender steelworkers mostly living in northwestern Indiana to give voice to this previously silent and invisible population. She presents powerful stories of the intersections of work, class, gender, and sexual identity in the dangerous industrial setting of the steel mill. The voices and stories captured by Balay by turns alarming, heroic, funny, and devastating challenge contemporary understandings of what it means to be queer and shed light on the incredible homophobia and violence faced by many. Nearly all of Balay's narrators remain closeted at work and many have experienced harassment, violence, or rape. Through the powerful voices of queer steelworkers themselves, *Steel Closets* provides rich insight into an understudied part of the LGBT population, contributing to a growing body of scholarship that aims to reveal and analyze a broader range of gay life in America.

Wives of Steel Karen Olson, 2005 *Wives of Steel* is based on more than eighty formal interviews conducted over a fifteen year period with women and some men, both white and black, all of whom were part of Sparrows Point as workers, spouses, or longtime residents of the local communities. Through the stories they tell, we see how a male dominated industry has influenced personal, family, and social experiences over several generations. We also see the distinct differences and surprising similarities among the lives of black and white women, which often reflect the complicated relationships among black and white steelworkers in the plant.

Heritage, Labour and the Working Classes Laura Jane Smith, Paul Shackel, Gary Campbell, 2012-05-23 *Heritage, Labour and the Working Classes* is both a celebration and commemoration of working class culture. It contains sometimes inspiring accounts of working class communities and people telling their own stories and weaves together examples of tangible and intangible heritage: place, history, memory, music, and literature. Rather than being framed in a social inclusion framework which sees working class culture as a deficit, this book addresses the question: What is labour and working class heritage, how does it differ or stand in opposition to dominant ways of understanding heritage and history, and in what ways is it used as a contemporary resource? It also explores how heritage is used in working class communities and by labour organizations and

considers what meanings and significance this heritage may have while also identifying how and why communities and their heritage have been excluded Drawing on new scholarship in heritage studies social memory the public history of labour and new working class studies this volume highlights the heritage of working people communities and organizations Contributions are drawn from a number of Western countries including the USA UK Spain Sweden Australia and New Zealand and from a range of disciplines including heritage and museum studies history sociology politics archaeology and anthropology Heritage Labour and the Working Classes represents an innovative and useful resource for heritage and museum practitioners students and academics concerned with understanding community heritage and the debate on social inclusion exclusion It offers new ways of understanding heritage its values and consequences and presents a challenge to dominant and traditional frameworks for understanding and identifying heritage and heritage making

Literature, Writing, and the Natural World James Guignard, T. P. Murphy, 2020-06-12 The English Association of Pennsylvania State Universities held its annual meeting in 2006 at Mansfield University in Pennsylvania The conference theme was Literature Writing and the Natural World This collection grows out of the conference and indicates the desire to understand all aspects of our relationship with the natural world the function of literature in clarifying that relationship in ways science and politics cannot and the role of the literature teacher scholar wanting to respond to pressures of environmental change In these times interpretation is a vital task not only for the way it educates us about our attitudes toward nature but because it develops the crucial skills of looking closely engaging reflecting and responding One could argue that as a culture Americans are behind the curve in understanding the ways we depend upon a healthy relationship with nature and one way among many depends upon examining it through texts and textual representation When the writers here dig into The Main Woods Jayber Crow the poetry of Pablo Guevara or the movie Crash they are contributing to our understanding of the ways in which we view nature and how that view plays a role in the way we relate to nature These days many disciplines engage global warming and other environmental issues routinely and the literature classroom should be no different Just as we read a book and address fundamental themes such as What does it mean to love or How do we develop identity we should also be asking What is my responsibility when I decide what resources to use If we understand literature as equipment for living in a warming world we may be able to help students make some sense out of their world and some decisions about how to act
