The Allen Sisters Pictorial Photographers 1885-1920:

The Allen Sisters Suzanne L. Flynt, 2002 Although the Allen sisters were once praised as being among The Foremost Women Photographers in America few people today have seen their photographs Based largely on new or long unseen material this biography is accompanied by 100 tritone plates and 40 duotone images BOOK JACKET *The Deaf Community in America* Melvia M. Nomeland, Ronald E. Nomeland, 2011-12-22 The deaf community in the West has endured radical changes in the past centuries This work of history tracks the changes both in the education of and the social world of deaf people through the years Topics include attitudes toward the deaf in Europe and America and the evolution of communication and language Of particular interest is the way in which deafness has been increasingly humanized rather than medicalized or pathologized as it was in the past Successful contributions to the deaf and non deaf world by deaf individuals are also highlighted Instructors considering this book for use in a course may request an examination copy here

Introduction to Deaf Culture Thomas K. Holcomb, 2023 You are about to enter the realm of Deaf culture a world that may be completely new to you Intriguingly insiders and outsiders to this world may regard it in two completely different fashions Let us examine this contradiction with the proverbial glass of water that can be viewed as either half full or half empty

Maine Photography Libby Bischof, Susan Danly, Earle G. Shettleworth, 2023-11-22 Maine has always played a rich and varied role in the art of photography For hundreds of years photographers like other artists have made their way to Maine to capture the natural beauty and human culture of the state So too have many photographers come from Maine and many contributions by Mainers have been made to the medium Maine in Photography is the first comprehensive overview of the history of photography in the state Providing basic knowledge of the most important people and institutions to have promoted photography this volume also studies the ways in which photography has informed the understanding of the social and cultural history of Maine Beginning with the earliest daguerreotype portraits of the 1840s this history traces the growth of the medium emphasizing key contributions such as the Stanley brothers invention of the dry plate process through to the present Key topics addressed throughout the book include the importance of photography in documenting labor and economic life the close relationship between photography and the growth of tourism and the role of Maine photographers in advancing the medium as a fine art form Published in conjunction with the Maine Photo Project this is a unique and timely addition to the body of work on the importance of Maine to American art Beyond the Architect's Eye Mary N. Woods, 2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium's power to depict how the past jostled the present In *Beyond the Architect's Eye* Mary N. Woods expands on this range of images through a rich analysis that commingles art amateur and documentary photography genres usually not considered architectural but that often take the built environment as their subject Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II

when urban and rural areas grew further apart in the face of skyscrapers massive industrialization and profound cultural shifts Central to this study is the work of Alfred Stieglitz Frances Benjamin Johnston and Marion Post Wolcott but Woods weaves a wider narrative that also includes Alice Austen Gertrude Kasebier Berenice Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old South crystallized in photographs like Johnston's *A New South* shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach Beyond the Architect's Eye is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography **Deaf**

Subjects Brenda Jo Brueggemann, 2009-05-01 In this probing exploration of what it means to be deaf Brenda Brueggemann goes beyond any simple notion of identity politics to explore the very nature of identity itself Looking at a variety of cultural texts she brings her fascination with borders and between places to expose and enrich our understanding of how deafness embodies itself in the world in the visual and in language Taking on the creation of the modern deaf subject Brueggemann ranges from the intersections of gender and deafness in the work of photographers Mary and Frances Allen at the turn of the last century to the state of the field of Deaf Studies at the beginning of our new century She explores the power and potential of American Sign Language wedged as she sees it between letter bound language and visual ways of learning and argues for a rhetorical approach and digital future for ASL literature The narration of deaf lives through writing becomes a pivot around which to imagine how digital media and documentary can be used to convey deaf life stories Finally she expands our notion of diversity within the deaf identity itself takes on the complex relationship between deaf and hearing people and offers compelling illustrations of the intertwined and sometimes knotted nature of individual and collective identities within Deaf culture

Clover Adams Natalie Dykstra, 2017-11-01 A biography of one of the Gilded Age's most fascinating and mysterious society women that reads as well as any page turning novel Library Journal At twenty eight Clover Adams a fiercely intelligent Boston Brahmin married the soon to be eminent American historian Henry Adams She thrived in her role as an intimate of power brokers in Gilded Age Washington where she was admired for her wit and taste by such luminaries as Henry James H H Richardson and General William Tecumseh Sherman Clover so clearly possessed as one friend wrote all she wanted all this world could give Yet at the center of her story is a haunting mystery Why did Clover having begun in the spring of 1883 to capture her world vividly through photography end her life less than three years later by drinking a

chemical developer she used in the darkroom The key to the mystery lies as Natalie Dykstra's searching account makes clear in Clover's photographs themselves The aftermath of Clover's death is equally compelling Dykstra probes Clover's enduring reputation as a woman betrayed and most movingly she untangles the complex poignant and universal truths of her shining and impossible marriage

Local Histories Patricia Donahue, Gretchen Flesher Moon, 2007-09-23 In *Local Histories* the contributors seek to challenge the widely held belief that the origin of American composition as a distinguishable discipline can be traced to a small number of elite colleges such as Harvard Yale and Michigan in the mid to late nineteenth century Through extensive archival research at liberal arts colleges normal schools historically black colleges and junior colleges the contributors ascertain that many of these practices were actually in use prior to this time and were not the sole province of elite universities Though not discounting the elites influence the findings conclude that composition developed in many locales concurrently Individual chapters reflect on student responses to curricula the influence of particular instructors or pedagogies in the context of compositional history and the difficulties inherent in archival research What emerges is an original and significant study of the developmental diversity within the discipline of composition that opens the door to further examination of local histories as guideposts to the origins of composition studies

The Deerfield Massacre James L. Swanson, 2025-02-04 From the New York Times bestselling author of *Manhunt* now an Apple TV series and in the tradition of *Empire of the Summer Moon* comes a vivid account The Wall Street Journal of a forgotten chapter in American history the deadly confrontation between natives and colonists in Massachusetts in 1704 and the tragic saga that unfolded Once it was one of the most infamous events in early American history Today it has been nearly forgotten In an obscure two hundred year old museum in a little town in western Massachusetts there stands what once was the most revered relic from the history of early New England the massive tomahawk scarred door that came to symbolize the notorious Deerfield Massacre of 1704 This impregnable barricade known to early Americans as The Old Indian Door constructed from double thick planks of Massachusetts oak and studded with hand wrought iron nails to repel the tomahawk blades wielded by several attacking Native tribes is the sole surviving artifact from one of the most dramatic moments in colonial American history In the leap year of 1704 on the cold snowy night of February 29 hundreds of Indians and their French allies swept down on an isolated frontier outpost to slaughter or capture its inhabitants The sacking of Deerfield led to one of the greatest sagas of survival sacrifice family and faith ever told in North America One hundred and twelve survivors including their fearless minister the Reverend John Williams were captured and forced to march three hundred miles north into enemy territory in Canada Any captive who faltered or became too weak to continue the journey including Williams's own wife fell under the tomahawk or war club Survivors of the march willed themselves to live and endured captivity Ransomed by the royal governor of Massachusetts the captives later returned home to Deerfield rebuilt their town and for the rest of their lives told the incredible tale The memoir of Rev Williams *The Redeemed Captive* published soon after his liberation became one of the first

bestselling books in American history and remains a literary classic *The Old Indian Door* is a touchstone that conjures up one of the most dramatic and inspiring stories of colonial America Now in this immersive and memorable book and with his gifts of great storytelling and penetrating insight James Swanson has given us a compelling account of an unjustly forgotten episode in American history Jon Meacham Pulitzer Prize winning author of *And There Was Light* *Wallace Nutting and the Invention of Old America* Thomas Andrew Denenberg, 2003-01-01 Congregational minister author photographer entrepreneur Wallace Nutting collected reproduced marketed colonial American artefacts
