The Altitude Of Prayer:

The Altitude of Prayer Joel S. Goldsmith,1996 It is often from the depths of desperation from a sense of abject isolation that we beg to know how to pray Joel explains what prayer is how to practice it and how the true understanding of prayer is preparation to receive the grace of God We can truly contact God that Power behind this world we inhabit [Index to The Altitude of Prayer by Joel S. civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer. The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen. The materials presented provide new insights into the early development of the prayer ritual in Islam. They also call into question the popular notion that religion could not inspire serious scientific activity. Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present. A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices.

A Brief Introduction to Astronomy in the Middle East John M. Steele, 2012-03-12. The Middle East is the birthplace of astronomy and the centre for its development during the medieval period. In this brief introduction John Steele offers an intriguing insight into Middle Eastern achievements in astronomy and their profound influence on the rest of the world. Amongst other things the book traces the Late Babylonians' ingenious schemes for modelling planetary motion. It also reveals how medieval Islamic advances in the study of the heavens and the design of precise astronomical instruments led to breakthroughs by Renaissance practitioners such as Copernicus and Kepler. An invaluable introduction to one of the oldest sciences in the world.
