The English Historical Tradition Since 1850:

The English Historical Tradition Since 1850 Christopher Parker, 1990 The English Historical Tradition Since 1850 Christopher Parker, 1990 *The Oxford History of Historical Writing: 1800-1945* Daniel R. Woolf, Andrew Feldherr, Grant Hardy, Ian Hesketh, 2011 A chronological scholarly survey of the history of historical writing in five volumes Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world

Historiography Roger Spalding, Christopher Parker, 2013-01-18 Historiography can be a daunting term for those not familiar with it This book presents the key ideas behind the term in a clear and accessible fashion The opening chapters introduce the reader to the practices that characterise the subject while the final chapters address the History of Nazism Gender History and Cultural History and seek to demonstrate that the historiographies of these sub disciplines grow and develop in response to changes within society at large This book aims to show that History is not simply an academic subject but an active and contested factor shaping the nature of the societies we live in As politicians in particular seek to validate their actions by drawing parallels between the past and present an ability to test these claims for logic and coherence and to assess the evidence used to support them becomes not simply a valuable academic skill but a vital requirement for active citizenship

The Science of History in Victorian Britain Ian Hesketh, 2016-09-12 New attitudes towards history in nineteenth century Britain saw a rejection of romantic literary techniques in favour of a professionalized scientific methodology The development of history as a scientific discipline was undertaken by several key historians of the Victorian period influenced by German scientific history and British natural philosophy This study examines parallels between the professionalization of both history and science at the time which have previously been overlooked Hesketh challenges accepted notions of a single scientific approach to history Instead he draws on a variety of sources monographs lectures correspondence from eminent Victorian historians to uncover numerous competing discourses *F D Maurice and the Crisis of Christian Authority* Jeremy Morris, 2005-03-17 F D Maurice was a leading 19th century Anglican theologian and social commentator This study argues that his work was driven above all by a concern to reinvigorate Anglican ecclesiology and to promote economical breadth of spirit that could transform the Church of England's relations with other Christian traditions

God and History Peter Bingham Hinchliff, 1992 Newman's revised *Essay on the Development of Doctrine* provides the starting point for this new and comprehensive survey in which Peter Hinchliff discusses the ideas of wide range of theologians from the full spectrum of Christianity from Roman Catholics through to theologians from the Churches of England and Scotland and the Free Church and their attempts to tackle these questions in the period leading up to the Great War **A.J.P. Taylor** Chris Wrigley, 2006-08-25 A scholar gentleman in the old style a northern non conforming radical an academic steeped in Oxford traditions a late 20th century media personality one of the most outstanding historians of his age A J P Taylor was all of these He wrote about traditional historical subjects in a traditional manner and took narrative history

to new heights and was equally at home with a critical academic as with a vast popular audience This biographical study of A J P Taylor includes details of Taylor s privileged and cosseted childhood the effect of his close but combative and stimulating family the dissenting and nonconformist tradition and his time as teacher broadcaster journalist and historian It attempts to evaluate how far he fulfilled his aim and conviction as to the importance of history and its place at the heart of national consciousness

Welfare and Social Policy in Britain Since 1870 Lawrence Goldman,2019-01-24 This collection of twelve essays reviews the history of welfare in Britain over the past 150 years It focuses on the ideas that have shaped the development of British social policy and on the thinkers who have inspired and also contested the welfare state It thereby constructs an intellectual history of British welfare since the concept first emerged at the end of the nineteenth century The essays divide into four sections The first considers the transition from laissez faire to social liberalism from the 1870s and the enduring impact of late Victorian philosophical idealism on the development of the welfare state It focuses on the moral philosophy of T H Green and his influence on key figures in the history of British social policy like William Beveridge R H Tawney and William Temple The second section is devoted to the concept of planning which was once in the mid twentieth century at the heart of social policy and its implementation but which has subsequently fallen out of favour A third section examines the intellectual debate over the welfare state since its creation in the 1940s Though a consensus seemed to have emerged during the Second World War over the desirability and scope of a welfare state extending from the cradle to the grave libertarian and conservative critiques endured and re emerged a generation later A final section examines social policy and its implementation more recently both at grass roots level in a study of community action in West London in the districts made infamous by the fire at Grenfell Tower in 2017 and at a systemic level where different models of welfare provision are shown to be in uneasy co existence today The collection is a tribute to Jose Harris emeritus professor of history in the University of Oxford and a pioneer of the intellectual history of social policy Taken together these essays conduct the reader through the key phases and debates in the history of British welfare

Citizenship, Community, and the Church of England Matthew Grimley,2004-06-17 This book traces the influence of Anglican writers on the political thought of inter war Britain and argues that religion continued to exert a powerful influence on political ideas and allegiances in the 1920s and 1930s It counters the prevailing assumption of historians that inter war political thought was primarily secular in content by showing how Anglicans like Archbishop William Temple made an active contribution to ideas of community and the welfare state a term which Temple himself invented Liberal Anglican ideas of citizenship community and the nation continued to be central to political thought and debate in the first half of the 20th century Grimley traces how Temple and his colleagues developed and changed their ideas on community and the state in response to events like the First World War the General Strike and the Great Depression For Temple and political philosophers like A D Lindsay and Ernest Barker the priority was to find a rhetoric of community which could unite the nation against class consciousness poverty and the threat of Hitler Their idea of

a Christian national community was central to the articulation of ideas of Englishness in inter war Britain but this Anglican contribution has been almost completely overlooked in recent debate on twentieth century national identity Grimley also looks at rival Anglican political theories put forward by conservatives such as Bishop Hensley Henson and Ralph Inge dean of St Paul s Drawing extensively on Henson s private diaries it uncovers the debates which went on within the Church at the time of the General Strike and the 1927 8 Prayer Book crisis The book uncovers an important and neglected seam of popular political thought and offers a new evaluation of the religious political and cultural identity of Britain before the Second World War
