The European Perspective Transnational Party Groups In The 1989-1994 European Parliament

Mark A. Pollack

The European Perspective Transnational Party Groups In The 1989-1994 European Parliament:

European Foreign Policy and the European Parliament in the 1990s Donatella M. Viola, 2019-06-04 This title was first published in 2000 This book investigates the European Parliament's stance vis-à-vis the 1990-1991 Gulf and 1991-1992 Yugoslav crises In unveiling the parliamentary multi-faceted view of these events reference has been made to the positions taken by constituent political groups and their voting behaviour In particular the following questions have been addressed Has the European Parliament sought to define and shape a common foreign policy with respect to the above crises What specific functions have the European Parliament political groups performed Have political groups succeeded in achieving an internal cohesion Has the European Parliament overcome divisions among its members through the formation of party coalitions despite the considerable flow of published material on external relations of the European Union and the European Parliament virtually no study has explored in depth the links between these two areas The purpose of this book is to fill the gap in the existing literature breaking new ground by combining a qualitative and quantitative analysis of parliamentary behaviour with foreign policy

The European Perspective Tapio Raunio, 2019-05-23 First published in 1997 this volume provides a data-rich analysis of the party groups in the European Parliament Their internal organisation cohesion and coalition behaviour are examined The main argument is that their internal organisation is a crucial factor in explaining the behaviour of EP party groups Roll call analysis is used to measure group cohesion and coalition behaviour The concept of representation in the transnational EP is studied by a content analysis of members' written questions The concluding section sets the work into a broader context by discussing the future of Europarties

The Role of Political Parties in the European Union Bjorn Lindberg, Anne Rasmussen, Andreas Warntjen, 2013-09-13 At the national level political parties play an important role in making representative democracy work They help to aggregate and communicate policy preferences link decision making between different legislative bodies and hold politicians accountable In the European Union however the electoral connection is weak This casts doubt on the impact of partisan politics at the European level Are political parties able to fulfil their role as transmission belts ensuring political accountability and consistent decision making in the European Union To answer this question we look at the micro-foundations of partisan politics in the European Union The contributions in this volume all depart from a common theoretical framework but use a wide range of empirical data and research designs covering qualitative process tracing elite interview and large N quantitative analysis Moreover they examine party effects in the electoral and legislative arena Finally the volume covers all European institutions the Commission the Council of the European Union the European Council and the European Parliament The findings enhance our understanding of the workings of decision making in Brussels add to the debate on the EU democratic deficit and highlight the usefulness of drawing upon insights from the literature on Comparative Politics when studying the European Union This book was published as a special issue of the Journal of European Public Policy

Immigration and Politics in the New Europe

Gallya Lahav, 2004-04-22 With almost a quarter of the world's migrants Europe has been attempting to regulate migration and harmonize immigration policy at the European level. The central dilemma exposed is how liberal democracies can reconcile the need to control the movement of people with the desire to promote open borders, free markets and liberal standards. Gallya Lahav's book traces ten years of public opinion and elite attitudes toward immigration cross nationally to show how and why increasing EU integration may not necessarily lead to more open immigration outcomes. Empirical evidence reveals that support from both elite and public opinion has led to the adoption of restrictive immigration policies despite the requirements of open borders. Unique in bringing together original data on European legislators and national elites, longitudinal data on public opinion and institutional and policy analyses, this 2004 study provides an important insight into the processes of European integration and globalization more broadly. Second Chambers Nicholas Baldwin, Donald Shell, 2013-01-11 Notwithstanding the fact that among the parliaments of the world 38 per cent have Second Chambers, 67 out of 179 Second Chambers themselves have only rarely been the focus of attention from politicians and have almost totally been ignored by academics. This work sets about examining them. **The Engines of European Integration** Mark A. Pollack, 2003-03-13 The European Union is composed of its fifteen member governments yet these governments have chosen repeatedly to delegate executive, judicial and legislative powers and substantial discretion to supranational institutions such as the Commission, the Court of Justice and the European Parliament. In *The Engines of European Integration*, the first full length study of delegation in the European Union and international politics, Mark Pollack draws on principal agent analyses of delegation, agency and agenda setting to analyze and explain the delegation of powers by governmental principals to supranational agents and the role played by those agents in the process of European integration. In the first part of the book Pollack analyses the historical and functional patterns of delegation to the Commission, the Court of Justice and the Parliament, suggesting that delegation to the first two is motivated by a desire to reduce the transaction costs of EU policymaking as predicted by principal agent models, while delegation of powers to the Parliament fits poorly with such models and primarily reflects a concern by member governments to enhance the democratic legitimacy of the Union. The second part of the book focuses on the role of supranational agents in both the liberalization and the re-regulation of the European market and suggests that the Commission, Court and Parliament have indeed played a causally important role alongside member governments as the engines of integration, but that their ability to do so has varied historically and across issue areas as a function of the discretion delegated to them by the member governments. Becoming Europeans? Roger Scully, 2005-08-25 An almost universal point of agreement in contemporary political science is that institutions matter. But the governing institutions of the European Union are widely presumed to matter more than most. A commonplace assumption about the EU is that those working within European institutions are subject to a pervasive tendency to become socialized into progressively more pro-integration attitudes and behaviours. The assumption has been integral to many accounts of European

integration and is also central to how scholars study individual EU institutions. However, the theoretical and empirical adequacy of this assumption has never been properly investigated. A serious study of whether political actors in the EU do tend to go native or not and why is long overdue. This study examines this question in the context of an increasingly important EU institution, the European Parliament. The book integrates new theoretical arguments with a substantial amount of original empirical research. It develops a coherent understanding based on simple rationalist principles of when and why institutional socialization is effective. This theoretical argument explains the main empirical findings of the book. Drawing on several sources of evidence on MEPs' attitudes and behaviour and deploying advanced empirical techniques, the empirical analysis shows the commonplace assumption about EU institutions to be false. European Parliamentarians do not become more pro-integration as they are socialized into the institution. The findings of the study generate some highly important conclusions. They indicate that institutional socialization of political elites should be given a much more limited and conditional role in understanding European integration than it is accorded in many accounts. They suggest that MEPs remain largely national politicians in their attitudes, loyalties and much of their activities and that traditional classifications of the European Parliament as a supra-national institution are misleading. Finally, the study offers broader lessons about the circumstances in which institutions effectively socialize those working within them.

Inside European Parliament Politics Laura Landorff, 2019-02-18. The study of the informal dimension of EU politics is more important than ever in order to understand how the EU system works. This book presents an innovative and original study on informal cross-party cross-committee groupings in the European Parliament, so-called Intergroups. Building on extensive fieldwork, including semi-structured interviews and observations, this study shows how parliamentarians of the seventh European Parliament (2009-2014) gain a variety of social resources such as social, informational and political capital in Intergroups, which they subsequently mobilise to foster opinion formation across political groups and parliamentary committees and to shape the EP's agenda and policy outcomes. Drawing on an interdisciplinary Bourdieusian-inspired framework, this book makes a valuable

contribution to sociological approaches in European integration studies Shedding new light on the informal dimension of parliamentary practices and politics this book appeals to EPas well as EU scholars to students and practitioners of EU politics and civil society *The Europeanization of National Political Parties* Thomas Poguntke,Nicholas Aylott,Elisabeth Carter,Robert Ladrech,Kurt Richard Luther,2007-02-12 This is a detailed exploration of how national political parties have responded to the increasing relevance of European governance The Europeanization of National Political Parties is the first empirical study to examine the effects of the European Union on the internal organizational dynamics of national political parties It draws on the results of a major cross national project and is based on documentary analysis and some 150 interviews with senior party actors in six EU member states Austria Britain France Germany Spain and Sweden Situated in the context of the debate on Europeanization the contributors illustrate that national political parties have been surprisingly well equipped to handle the challenges of the increasing importance of multi level governance in Europe Following a rigorous analytical framework the country studies examine thirty relevant political parties and systematically address a clearly defined set of empirical questions The volume ends with two comparative chapters that analyze the findings from a cross national perspective and that offer theoretical insights into the problems of party government amid increasing European integration This text will appeal to all those researching in the fields of European studies political science and comparative politics
