The Explanation Of Culture Change Models In Prehistory:

The Explanation of Culture Change: Models in Prehistory Colin Renfrew, 1973 **The Explanation of Culture Change** C. RENFREW (ed), 1973 **The Explanation of Culture Change: Models in Prehistory** Colin Renfrew, 1973

Theory and Explanation in Archaeology Colin Renfrew, M. J. Rowlands, Barbara Abbott Segraves, University of Southampton. Department of Archaeology, 1982 **Current Approaches to Tells in the Prehistoric Old World** Antonio Blanco-González, Tobias L. Kienlin, 2020-11-30 Deeply stratified settlements are a distinctive site type featuring prominently in diverse later prehistoric landscapes of the Old World Their massive materiality has attracted the curiosity of lay people and archaeologists alike Nowadays a wide variety of archaeological projects are tracking the lifestyles and social practices that led to the building up of such superimposed artificial hills However prehistoric tell dwelling communities are too often approached from narrow local perspectives or discussed within strict time and culture specific debates There is a great potential to learn from such ubiquitous archaeological manifestations as the physical outcome of cross cutting dynamics and comparable underlying forces irrespective of time and space This volume tackles tells and tell like sites as a transversal phenomenon whose commonalities and divergences are poorly understood yet may benefit from cross cultural comparison Thus the book intends to assemble a representative range of ongoing theory and science based fieldwork projects targeting this kind of sites With the aim of encompassing a variety of social and material dynamics the volume s scope is diachronic from the Earliest Neolithic up to the Iron Age and covers a very large region from Iberia in Western Europe to Syria in the Middle East The core of the volume comprises a selection of the most remarkable contributions to the session with a similar title celebrated in the European Association of Archaeologists Annual Meeting held at Barcelona in 2018 In addition the book includes invited chapters to round out underrepresented areas and periods in the EAA session with relevant research programmes in the Old World To accomplish such a cross cultural course the book takes a case based approach with contributions disparate both in their theoretical foundations from household archaeology social agency and formation theory and their research strategies including geophysical survey microarchaeology and high resolution excavation and dating

What's Changing: Population Size Or Land-use Patterns? Val Attenbrow, 2007-02-01 The Upper Mangrove Creek catchment was an ideal locality in which to undertake field investigation into Aboriginal use of the coastal hinterland The area 101 square kilometres in size is rich in sites that provided significant archaeological evidence of Aboriginal use of the coastal hinterland The catchment became the focus of major archaeological salvage work in the late 1970s prior to the construction of the Mangrove Creek Dam Further research undertaken by Val Attenbrow on the total catchment expanded upon the results of earlier work This monograph describes the later research project and summarises the salvage program results This evidence is used by the author to explore current research issues relating to the interpretation of the mid to late Holocene archaeological record in Australia particularly quantitative changes relating to population numbers and aspects of

human behaviour such as risk management subsistence mobility and land use patterns **Roman Seas** Justin Leidwanger,2020-03-11 Drawing together maritime landscape studies and network analysis this book offers an archaeological exploration of seaborne economy and connectivity across the Roman eastern Mediterranean where the material record of shipwrecks and ports reveals multiple evolving regional and interregional systems of interaction

Metaarchaeology Lester Embree,2012-12-06 An idea of the philosophy of archaeology can best be gained by showing what it is what the issues are who is working in the field and how they proceed Reading Lester Embree s Metaarchaeology provides the best possible introduction to the field since in it several leading archaeologists show how accessible and interesting the current archeological literature is and currently active philosophers of archaeology reveal something of the current state of discussion on the subject Bibliographies have also been developed of the philosophy of archaeology as well as of selected parts of the component that can be called metaarchaeology Finally an historical introduction has been included to show the variety of metascientific as well as orientational standpoints that philosophers of archaeology have had recourse to for over two decades followed by speculation about the future of the discipline within the philosophy of science *Exploring Agrodiversity* H. C. Brookfield,2001 Small farmers are often viewed as engaging in wasteful practices that wreak ecological havoc Exploring Agrodiversity sets the record straight Small farmers are in fact ingenious and inventive and engage in a diverse range of land management strategies many of them resourcefully geared toward conserving resources especially soil Using case studies from Africa Asia Latin America and the Pacific this book provides in depth analysis of agricultural diversity and explores its history *Archaeology* Kevin Greene,Tom Moore,2010-06-17 This book details modern archaeologists methods of studying the past describing basic practical procedures as well as complex scientific techniques used in analysis It also examines traditional methodology fieldwork and excavation
