Situations and Speech Acts David A. Evans, 2016-11-18 First published in 1985 this book aims to develop an approach to speech acts that has the virtue of being straight forward explicit formal and flexible enough to accommodate many of the more general problems of interactive verbal communication The first chapter introduces situation semantics with the second addressing the assumptions implied by the problem of representing speaker intentionality The third chapter presents a streamlined theory of speech acts and the fourth tests the predictions of the theory in several hypothetical discourse situations A summary and suggestions for further research is provided in chapter five and appendices facilitate reference to key concepts

Situations and Speech Acts David Andreoff Evans, 1981 **Speech Act Theory and Pragmatics** John Searle, F. Kiefer, M. Bierwisch, 2012-12-06 In the study of language as in any other systematic study there is no neutral terminology Every technical term is an expression of the assumptions and theoretical presuppositions of its users and in this introduction we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms speech acts and pragmatics The notion of a speech act is fairly well understood The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression but rather the performance of certain kinds of acts such as making statements asking questions giving orders describing explaining apologizing thanking congratulating etc Characteristically a speaker performs one or more of these acts by uttering a sentence or sentences but the act itself is not to be confused with a sentence or other expression uttered in its performance Such types of acts as those exemplified above are called following Austin illocutionary acts and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance Such acts as convincing persuading annoying amusing and frightening are all cases of perlocutionary acts

Language and Action Danilo Marcondes de Souza Filho, 1985-01-01 This work consists of an examination and revision of some of the main theses of Speech Act Theory in relation to the problem of ideology and action guiding language Starting from the idea that linguistic philosophy must take into account how the social structure of the linguistic community may influence and direct the way its language is used a critical method of analysis is proposed developing Speech Act Theory in a way suitable for this purpose The main guideline of this proposal is the consideration that a theory of action rather than a theory of meaning should be taken as central in the analysis of language The notion of illocutionary force the problem of intentions and conventions in the constitution of speech acts the definition of context and the classification of speech acts are then discussed Based on the conclusions of this discussion a pragmatic method for the analysis of language is formulated

Doing What Comes Naturally Stanley Fish, 1989 In literary theory the philosophy of law and the sociology of knowledge no issue has been more central to current debate than the status of our interpretations Do they rest on a ground of rationality or are they subjective impositions of a merely personal point of view In *Doing What Comes Naturally* Stanley Fish refuses the dilemma posed by this question and argues that while we can never separate our judgments from the contexts in which they are made those judgments are

nevertheless authoritative and even in the only way that matters objective He thus rejects both the demand for an ahistorical foundation and the conclusion that in the absence of such a foundation we reside in an indeterminate world In a succession of provocative and wide ranging chapters Fish explores the implications of his position for our understanding of legal literary and psychoanalytic interpretation the nature of professional and institutional culture and the place of reason in a world that is rhetorical through and through Publisher description
