Bulletin of the Atomic Scientists, 1980-02 **Demography and National Security** Myron Weiner, Sharon Stanton Russell, 2001-08 Political scientists demographers legal scholars and historians have come together in this volume under the direction of the late Myron Weiner one of the leading scholars in this field to address three of the major sets of questions in the field of political demography How changes in demographic variables population size growth distribution and composition influence threats real or perceived to a country's political stability and security how governments respond to demographic trends and how governments attempt to change demographic variables in order to enhance national security **The Oxford History of Twentieth Century** Michael Howard, William Roger Louis, 2002-08-08 In this ambitious book some of the most distinguished historians in the world survey the momentous events and the significant themes of recent times with a look forward to what the future might bring Early chapters take a global overview of the century as a whole from a variety of perspectives demographic scientific economic and cultural Further chapters all written by acknowledged experts chart the century's course region by region The Oxford History of the Twentieth Century is an invaluable repository of information and offers unparalleled insights on the twentieth century International population policy issues and choices for the United States, 1987

Bulletin of the Atomic Scientists, 1980-02 *Housing and Planning References*, 1979 **How To Defeat Liberalism And William F. Buckley** Lyndon H. LaRouche, Jr., 2019-09-11 The modern British liberals have thus deployed a pincers movement against the political institutions of the United States The overt liberals attack from the left while the fifth column of liberals in conservative disguises infiltrates from the right and shatters the resistance against liberalism from within To the extent that the national party machines are under the total or significant control of the New York crowd around CFR the party leaderships and their candidates are unable to reach agreement on any policies but those which run deliberately against the most vital interests of the United States and its people If the nonliberals plus a majority of trade

unionists and minority strata were to assemble themselves as a unified political force nationally the effect of this would be to establish the New York Times Washington Post Newsweek and so forth as despised dirty words in a majority of the neighborhoods factories and so forth of the nation This has not occurred thus far because the national profile of the two principal parties prevents the nonliberal majority of the citizenry from agreeing upon policy outlooks which efficiently correspond to the combined effect of their underlying interests and organically nonliberal impulses Lyndon LaRouche in this book This 1979 book by Lyndon LaRouche outlines the strategy for unifying the American citizenry around the real long term interest of each citizen regardless of personal circumstances endless progress Forty years later his insights are key to the process which is now pulling America out of the Dark Age which had been fostered by the British cultural warfare he identified Yes the continuous string of hoaxes from London are wearing very thin with Americans Lone Assassin Energy Crisis New Hitler with Weapons of Mass Destruction Recreational Drug Use Global Warming Crisis Russia did it regardless of what it is etc have destroyed the credibility of the various imperial tentacles More and more Americans along with most of the nations of the world are coalescing behind the ideas of Mr LaRouche for universal progress

Immigration Phobia and the Security Dilemma Mikhail A. Alexseev, 2006 Immigration phobia is a paradoxical global phenomenon neither theories that link conflict to symbolic and realistic threats nor the contact hypothesis can systematically explain intense anti migrant alarmism and exclusionism toward marginally small migrant minorities Through a careful comparative study of immigration attitudes in the Russian Far East the EU and the United States this book is the first to demonstrate that concerns about national identity and economic interests associated with migration are themselves ignited by a unique perceptual logic of the security dilemma Regression analysis and case studies trace support for expulsion of migrants to human yearning for pre emptive self defense under uncertainty Alarmism and hostility arise from ambiguities about immigration consequences and migrants motivations Framing migration as a national security problem is therefore logical but counterproductive The book instead recommends managing migration through economic incentives and new institutions at the global national and local level

The Effects Of Receiving Country Policies On Migration Flows Sergio Diaz-briquets, Sidney Weintraub, 2019-06-26 This book deals with migrant sending countries in the Western Hemisphere because that was the Commission s mandate and because the bulk of undocumented immigrants into the United States come from Mexico and other countries of the Caribbean Basin
