The background is an abstract, painterly composition. At the top, a multi-colored rainbow arches across the frame. Below it, dark, swirling, and layered shapes in shades of blue, purple, and black create a sense of depth and movement. In the lower foreground, a portion of a red book cover is visible, featuring a yellow and orange design. The overall aesthetic is surreal and artistic.

B. Reid, 2009-08-21 A critique of selectionism and the proposal

of an alternate theory of emergent evolution that is causally sufficient for evolutionary biology Natural selection is commonly interpreted as the fundamental mechanism of evolution Questions about how selection theory can claim to be the all sufficient explanation of evolution often go unanswered by today's neo Darwinists perhaps for fear that any criticism of the evolutionary paradigm will encourage creationists and proponents of intelligent design In *Biological Emergences* Robert Reid argues that natural selection is not the cause of evolution He writes that the causes of variations which he refers to as natural experiments are independent of natural selection indeed he suggests natural selection may get in the way of evolution Reid proposes an alternative theory to explain how emergent novelties are generated and under what conditions they can overcome the resistance of natural selection He suggests that what causes innovative variation causes evolution and that these phenomena are environmental as well as organismal After an extended critique of selectionism Reid constructs an emergence theory of evolution first examining the evidence in three causal arenas of emergent evolution symbiosis association evolutionary physiology behavior and developmental evolution Based on this evidence of causation he proposes

some working hypotheses examining mechanisms and processes common to all three arenas and arrives at a theoretical framework that accounts for generative mechanisms and emergent qualities Without selectionism Reid argues evolutionary innovation can more easily be integrated into a general thesis Finally Reid proposes a biological synthesis of rapid emergent evolutionary phases and the prolonged dynamically stable non evolutionary phases imposed by natural selection *The Cambridge Companion to Science Fiction* Edward James, Farah Mendlesohn, 2003-11-20 Science fiction is at the intersection of numerous fields It is a literature which draws on popular culture and which engages in speculation about science history and all types of social relations This volume brings together essays by scholars and practitioners of science fiction which look at the genre from these different angles After an introduction to the nature of science fiction historical chapters trace science fiction from Thomas More to more recent years including a chapter on film and television The second section introduces four important critical approaches to science fiction drawing their theoretical inspiration from Marxism postmodernism feminism and queer theory The final and largest section of the book looks at various themes and sub genres of science fiction A number of well known science fiction writers contribute to this volume including Gwyneth Jones Ken MacLeod Brian Stableford Andy Duncan James Gunn Joan Slonczewski and Damien Broderick **Posthuman Biopolitics** Bruce Clarke, 2020-01-20 This volume presents the first collection of essays dedicated to the science fiction of microbiologist Joan Slonczewski Posthuman Biopolitics consolidates the scholarly literature on Slonczewski's fiction and demonstrates fruitful lines of engagement for the critical cultural and theoretical treatment of her characters plots and storyworlds Her novels treat feminism in relation to scientific practice resistance to domination pacifism versus militarism the extension of human rights to nonhuman and posthuman actors biopolitics and posthuman ethics and symbiosis and communication across planetary scales Posthuman Biopolitics explores the breadth and depth of Joan Slonczewski's vision uncovering the reflective ethical practice that informs her science fiction **Disability in Science Fiction** K.
