Advances in Information Processing and Protection Jerzy Pejas,Khalid Saeed,2007-09-29 The Computer Science is relatively new field which is developing very fast not only because due to the huge interest of scientists and the market request but also because this science has created possibilities for people of investigation and solved many problems that some time ago seemed to be insolvable Such problems had only been described in science fiction novels like underwater journeys of captain Nemo described by Jules Verne in XIX century At present various human dreams are successively becoming reality exactly as the underwater journeys became possible in the XX century The proposed book gives you a view of the progress in such domains of Computer Science as Artificial Intelligence Biometrics Security of Information Technology Computer Information Systems and Industrial Management The works contained in the book describe the newest investigation results of devoted scientists from Europe and Asia The book is written in a hard scientific language It is really valuable and I am sure it will deliver you many scientific benefits Professor Andrzej Piegat Szczecin University of Technology Faculty of Computer Science and Information Systems and University of Szczecin Poland Faculty of Economic Sciences and Management ACKNOWLEDGMENTS We would like to express our indebtedness to all professors and IPC Members who took upon themselves the task of reviewing the papers presented in this book They are Real World Data Mining Applications Mahmoud Abou-Nasr,Stefan Lessmann,Robert Stahlbock,Gary M. Weiss,2014-11-13 Data mining applications range from commercial to social domains with novel applications appearing swiftly for example within the context of social networks The expanding application sphere and social reach of advanced data mining raise pertinent issues of privacy and security Present day data mining is a progressive multidisciplinary endeavor This inter and multidisciplinary approach is well reflected within the field of information systems The information systems research addresses software and hardware requirements for supporting computationally and data intensive applications Furthermore it encompasses analyzing system and data aspects and all manual or automated activities In that respect research at the interface of information systems and data mining has significant potential to produce actionable knowledge vital for corporate decision making The aim of the proposed volume is to provide a balanced treatment of the latest advances and developments in data mining in particular exploring synergies at the intersection with information systems It will serve as a platform for academics and practitioners to highlight their recent achievements and reveal potential opportunities in the field Thanks to its multidisciplinary nature the volume is expected to become a vital resource for a broad readership ranging from students throughout engineers and developers to researchers and academics **Machine Vision Applications in Industrial Inspection** ,2000 **17th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2022)** Pablo García Bringas,Hilde Pérez García,Francisco Javier Martinez-de-Pison,José Ramón Villar Flecha,Alicia Troncoso Lora,Enrique A. de la Cal,Álvaro Herrero,Francisco Martínez Álvarez,Giuseppe Psaila,Héctor Quintián,Emilio S. Corchado Rodriguez,2022-10-11 This book

contains accepted papers presented at SOCO 2022 conference held in the beautiful and historic city of Salamanca Spain in September 2022 Soft computing represents a collection or set of computational techniques in machine learning computer science and some engineering disciplines which investigate simulate and analyze very complex issues and phenomena After a thorough peer review process the 17th SOCO 2022 International Program Committee selected 64 papers which are published in these conference proceedings and represent an acceptance rate of 60% In this relevant edition a particular emphasis was put on the organization of special sessions Seven special sessions were organized related to relevant topics such as machine learning and computer vision in Industry 4 0 time series forecasting in industrial and environmental applications optimization modeling and control by soft computing techniques soft computing applied to renewable energy systems preprocessing big data in machine learning tackling real world problems with artificial intelligence The selection of papers was extremely rigorous to maintain the high quality of the conference We want to thank the members of the program committees for their hard work during the reviewing process This is a crucial process for creating a high standard conference the SOCO conference would not exist without their help   **Digital Connectivity – Social Impact** S.
