the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

The Problem of Naturalism Brian Lightbody, 2013-05-09 Philosophers often use the term naturalism in order to describe their work It is commonplace to see a metaphysical epistemological and or ethical position self described and described by others as one that is naturalized But what if anything does the term naturalized add or subtract to the position being articulated I demonstrate in *The Problem of Naturalism* Analytic and Continental Perspectives that the term naturalism connotes such a broad meaning that it is difficult to demarcate naturalism from philosophy itself Still many philosophers have tried to provide non trivial and non vacuous definitions of the term My book by and large argues that such attempts are unsuccessful Instead I argue that naturalism is an attitude and neither a methodology nor a substantive position I then articulate the guidelines the naturalist needs to follow as well as the virtues he or she needs to practice in order for the term naturalism to do any meaningful work Much of the book explains and then critiques the various attempts to define naturalism in the Anglo American secondary literature Some of the criticisms I raise seem to emanate from the internal logic of the naturalistic position being expressed However others have emerged from gleaning the work of such Continental thinkers as Nietzsche Husserl Heidegger and Foucault I use these thinkers in order to expose the unjustified implicit and sometimes explicit assumptions that many naturalistic philosophers presume to hold when they attempt to render a clear distinct and robust naturalist position

Rethinking the

BSE Crisis Louise Cummings, 2010-08-09 In 1986 the emergence of a novel brain disease in British cattle presented a unique challenge to scientists. How that challenge was addressed has been the subject of a public inquiry and numerous academic studies conducted to date. However, none of these investigations has sought to examine the reasoning of scientists during this critical period in the public health of the UK. Using concepts and techniques in informal logic, argumentation and fallacy theory, this study reconstructs and evaluates the reasoning of scientists in the ten year period between 1986 and 1996. Specifically, a form of presumptive reasoning is described in which extensive use is made of arguments traditionally identified as informal fallacies. In the context of the adverse epistemic conditions that confronted scientists during the BSE epidemic, these arguments were anything but fallacious, serving instead to confer a number of epistemic gains upon scientific inquiry. This book argues for a closer integration of philosophy with public health science, an integration that is exemplified by the case of scientific reasoning during the BSE affair. It will therefore be of interest to advanced students, academics, researchers and professionals in the areas of public health science and epidemiology, as well as philosophical disciplines such as informal logic, argumentation and fallacy theory, and epistemology.

Questions H. Hiz, 2012-12-06 To the philosopher, the logician and the linguist, questions have a special fascination. The two main views of language—that it describes the world and that it expresses thought—are not directly applicable to questions. Questions are not assertions. A question may be apt, sharp to the point, important, or it may be inappropriate, ambiguous, awkward, irrelevant, or irreverent. But it cannot be true or false. It does not have a truth value, not just because an utterance like “Was the letter long” does not indicate which letter is being talked about. The indicative “The letter was not long” has the same indeterminacy. In actual context, the anaphoric definite article will be resolved both for a question and for an indicative sentence. Contextual resolutions are easily found for most cross references. A question cannot be either true or it does not describe a state of affairs. Neither does it express false because thought, because it is an expression of suspended thought, of lack of judgment. To dress it in other philosophical styles, a question is not a judgment, it is not a proposition, it is not an assertion. A philosopher may try to paraphrase a question as an indicative sentence, for instance, as a statement of ignorance, or as a statement of the desire to know. Hintikka, Wachowicz, and Lang explore this territory. Or he may interpret it as a meta statement intimating the direction in which the flow of the discourse is going.

American Book Publishing Record, 2001 *Studies in Philosophy for Children* Matthew Lipman, 1992 Harry Stottlemeier’s Discovery, created by Matthew Lipman in 1969, is now a widely used tool for teaching philosophy to children. As the original novel of the Philosophy for Children program, its goal is to present major ideas in the history of philosophy while nurturing children’s ability to think for themselves. This collection of essays reflects upon the development, refinement, and maturation of Philosophy for Children and on its relationship to the tradition of philosophy itself. This book is an attempt to improve the practice of Philosophy for Children as it applies to the teaching of Harry Stottlemeier’s Discovery to primary school students. This book involves an attempt to answer a question that arises when one tries to move

from theory to practice What must practitioners know in order to translate theoretical claims into action In the following chapters that question is answered in a variety of ways by philosophers educators and practicing teachers The answers they propose frequently shed as much light on the theory of Philosophy for Children as they do on the practice Studies in Philosophy for Children is aimed at the teachers who have been trained in Philosophy for Children

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
