The Academic Marketplace:

The Academic Marketplace Theodore Caplow,Reece Jerome McGee,1965 *The Academic Marketplace* , This volume is a must for anyone interested in academic problems and will produce the emotion of recognition in those concerned and the emotion of surprise in those outside the field Los Angeles Times Professors Caplow and McGee have given scholarly respectability to what many a professor has long suspected Competition in the academic marketplace is as severe as in the business world Their book might come to have the same function for the professor as Machiavelli s work had for ambitious princes Midwest Journal of Political Science The Academic Marketplace is a straightforward hard hitting expos of the American university Caplow and McGee consider all the working parts of the system and assess their suitability to the professed purpose Their report on the actualities myths and consequences of routines thus amounts to an anatomy of an institution an anatomy that does not present a pretty picture We learn for example that the chief criteria used in making appointments are prestige and compatibility not teaching ability The authors describe the precipitous decline in teaching loads and then explain how this tendency is related to the new seller s market on the one hand and to the extravagantly indeterminate structure of the university as an institution on the other Not only is the temper judicious the facts well gathered and competently marshaled but the expression of results is invariably lucid In a new introduction the authors sort out fact from legend and discern trends they address the validity of their own research methods and the applicability of their original findings to today s academic marketplace They observe that the essential commodity offered in the academic marketplace is still the same the mysterious intangible called prestige by which universities colleges departments disciplines fields of inquiry journals and ultimately faculty candidates are ranked from high to low and raised up and cast down accordingly Theodore Caplow is Commonwealth Professor of Sociology at the University of Virginia He is the author of Systems of War and Peace American Social Trends and Peace Games Reece J McGee is professor of sociology emeritus at Purdue University He was awarded the American Sociological Association Award for Distinguished Contributions to Teaching He is the author of Academic Janus three textbooks and numerous articles on the academic profession and teaching **The Academic Marketplace** Theodore Caplow,Reece J. McGee,1968 The Academic Marketplace Theodore Caplow,Reece Jerome McGee,Reece J. Mac Gee,1965 **The Market for Academics** Christine Musselin,2009-12-04 This book addresses academic labor markets in three countries France Germany and the United States The management of faculty careers is a critical issue in university autonomy and in many countries recent reforms have increasingly addressed this area Musselin s exhaustive empirical research on academic job hiring practices and faculty career patterns included over 200 interviews with faculty members and administrators concerning two disciplines history and math Each of the countries has very different historical traditions with regard to how peers recruit their colleagues within the academy Using what is known as an economics of quality comparative approach she sheds new light on faculty worklife The author s focus on the criteria of

evaluation in academic hiring decisions is a unique contribution and one that should stimulate the current debates on higher education reforms

The Academic Man Logan Wilson, 2017-07-12 When it was originally published *The Academic Man* was the first full scale social science based study on the American academic profession The issues identified by Logan Wilson in 1942 remain central to any consideration of the American professoriate Wilson demonstrates the usefulness of a historical perspective in understanding the present as well as the considerable continuity in higher education His acute observations remain a critical base for contemporary studies of higher education The *Academic Man* explores three main aspects of higher education the academic hierarchy academic status and academic processes and functions He discusses the difficulty college graduates have in finding jobs a problem still prevalent today He also examines the small number of publications produced by graduates with Ph Ds showing that only a few account for the greatest percentage of publications as well as the ratio of teaching activities to non teaching activities performed by faculty members In his new introduction Philip G Altbach discusses the changes that have occurred in the college community during the past half century including the expansion of universities and the increasing diversity of students and faculty in terms of gender ethnicity and religious background At the same time he shows how Wilson's basic tenets continue to hold true for contemporary academic life The timelessness of *The Academic Man* will make it a valuable resource for students professors university administrators and sociologists

A New Academic Marketplace Dolores L. Burke, 1988-11-21 This book examines faculty mobility in the 1980s from the perspective of process and market environment and makes comparisons between current research findings and those reported by Theodore Caplow and Reece McGee in 1958 in *The Academic Marketplace* The present study like the earlier one encompasses faculty recruitment including search and selection procedures and effect and the circumstances of termination such as denial of tenure voluntary resignation retirement and death The research findings are based on data obtained from 306 faculty members in personal and telephone interviews conducted during the period from December 1985 to April 1986 and mail response the sample universities were six of those used in the earlier survey The findings are discussed in comparison to human resource management in the nonacademic sector and implications for the practice of human resource management in academic settings contributing to an organizational culture An important feature of this book is the introduction of management techniques and management thinking at the departmental level that did not exist in the 1950s The author contends however that new management strategies appear to have little effect on the recruitment and termination processes and that these processes have remained traditionally based while the organization is changing under environmental influences This unique and timely work will be of interest to a broad academic population providing new insights into the academic world for anyone interested in the present state of higher education and will be a welcome addition in the research and study of sociology nonprofit management and university organization
