## **The Acts Of The Council Of Chalcedon:**

**The Acts of the Council of Chalcedon** Richard Price, Michael Gaddis, 2007-01-01 The Council of Constantinople of 553 often called Constantinople II or the Fifth Ecumenical Council has been described as by far the most problematic of all the councils because it condemned two of the greatest biblical scholars and commentators of the patristic era Origen and Theodore of Mopsuestia and because the pope of the day Vigilius first condemned the council and then confirmed its decisions only under duress The present edition makes accessible to the modern reader the acts of the council session by session and the most important related documents particularly those that reveal the shifting stance of Pope Vigilius veering between heroic resistance and abject compliance The accompanying commentary and substantial introduction provide a background narrative of developments since Chalcedon a full analysis of the policy of the emperor Justinian who summoned and dominated the council and of the issues in the debate and information on the complex history of both the text and the council's reception The editor argues that the work of the council deserves a more sympathetic evaluation than it has generally received in western Christendom since it arguably clarified rather than distorted the message of Chalcedon and influenced the whole subsequent tradition of eastern Orthodoxy In interpreting Chalcedon the conciliar acts provide a fascinating example of how a society in this case the imperial Church of Byzantium determines its identity by how it understands its past

origin in a conference held at Oxford in 2006 to mark the publication of the first English edition of the Acts of Chalcedon Its aim is to place Chalcedon in a broader context and bring out the importance of the acts of the early general councils from the fifth to the seventh century documents that because of their bulk and relative inaccessibility have received only limited attention till recently This volume is evidence that this situation is now rapidly changing as historians of late antiquity as well as specialists in the history of the Christian Church discover the richness of this material for the exploration of common concerns and tensions across the provinces of the Later Roman Empire language use networks of influence and cultural exchange and political manipulation at many different levels of society The extent to which the acts were instruments of propaganda and should not be read as a pure verbatim record of proceedings is brought out in a number of the essays which illustrate the fascinating literary problems raised by these texts

**Leo the Great and the Spiritual Rebuilding of a Universal Rome** Susan Wessel, 2008-08-29 Leo the Great responded to the crisis of the western empire by replacing secular Rome with a Christian universal Rome that could survive its political demise His humanitarian theology emphasizing the human nature of Christ made this universal Rome legitimate

**The Acts of the Early Church Councils** Thomas Graumann, 2021-08-20 The Acts of Early Church Councils Acts examines the acts of ancient church councils as the objects of textual practices in their editorial shaping and in their material conditions It traces the processes of their production starting from the recording of spoken interventions during a meeting to the preparation of minutes of individual sessions to their collection into larger units their storage and the earliest attempts at their dissemination Thomas Graumann demonstrates that the preparation of paperwork is central for the bishops self presentation and the projection of prevailing conciliar ideologies The councils aspirations to legitimacy and authority before real and imagined audiences of the wider church and the empire and for posterity fundamentally reside in the relevant textual and bureaucratic processes Council leaders and administrators also scrutinized and inspected documents and records of previous occasions From the evidence of such examinations the volume further reconstructs the textual and physical characteristics of ancient conciliar documents and explores the criteria of their assessment Reading strategies prompted by the features observed from material textual objects handled in council and the opportunities and limits afforded by the techniques of writing up conciliar business are analysed Papyrological evidence and contemporary legal regulations are used to contextualise these efforts The book thus offers a unique assessment of the production processes character and the material conditions of council acts that must be the foundation for any historical and theological research into the councils of the ancient church
