The Aesthetic Townscape:

The Aesthetic Townscape Yoshinobu Ashihara, 1983 A theoretical examination of city planning discusses the different methods of using space in Japanese and Western cities

The Aesthetic Townscape Yoshinobu Ashihara, Lynne E. Riggs, 1984-01 Japan's most celebrated architects develop in this book a cross-cultural perspective on how people actually perceive and experience the urban environments they come into contact with. The Aesthetic Townscape spans East and West, ranging from traditional villages of Japan, dwellings of the Italian Apulia and gardens of the Aegean islands to New York, Chandigarh and Brasilia. It compares and contrasts the handling of such spatial elements as walls, floors and doorways in different cultures and considers the demarcations between interior and exterior, private and public spaces in both modern and ancient architecture and town planning. The book is extensively illustrated with night scenes, squares, residential neighborhoods, landmark structures and with maps, plans and drawings. Mr. Ashihara holds the chair of architecture at the University of Tokyo and is president of Yoshinobu Ashihara Architect Associates.

Quantitative Research on Street Interface Morphology Yu Zhou, 2022-09-15 This book investigates the historical evolution, regional differences and quantitative measurement on street interface, which forms the street space and plays a very important role in urban form. Empirical research reveals that the street interface in Chinese cities is much more complicated than European and American cities. This book explores the reason and reveals the relationship between street interface and urban form in morphology. By constructing a quantitative measurement method on street interface morphology, quantitative parameters can be used in urban planning guidelines in China. Both researchers and students working in architecture, urban design, urban planning and urban studies can benefit from this book.

Introduction to Residential Layout Mike Biddulph, 2007-03-30 *Introduction to Residential Layout* is ideal for students and practitioners of urban design, planning, engineering, architecture and landscape seeking a comprehensive guide to the theory and practice of designing and laying out residential areas. Mike Biddulph provides a clear and coherent framework from which he offers comprehensive practical advice for designers of housing developments. Referring to a wealth of international examples, this is a richly illustrated, accessible resource covering the whole range of issues that should be considered by anyone engaging in the planning and design of a new residential scheme. A successful residential development must work on many levels: financial, social and environmental. This book includes analysis of commercial viability, the importance of place-making, environmental sustainability and designing accessibility. Mike Biddulph details successful approaches to designing out crime and maximising permeability as part of an integrated approach to urban design. Highly illustrated throughout, this work will show you how to turn design aspirations and principles into practical design solutions. Written without preconceptions, *Introduction to Residential Design* highlights the strengths and weaknesses of particular design solutions to encourage both depth of thought

and creativity Mike Biddulph is Senior Lecturer in Urban Design at Cardiff University

Understanding Cities Alexander Cuthbert, 2011-06-06 *Understanding Cities* is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books *Designing Cities* and *The Form of Cities* Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which *Understanding Cities* is the culminating text

Environmental Aesthetics J. Douglas Porteous, 2013-07-04 *Environmental Aesthetics* is a comprehensive introduction It includes a history of aesthetics discussing the psychology of human environment relations and artistic influences on the city and analysing the roles of policy and planning

Civil Engineering And Urban Planning - Proceedings Of The 5th International Conference On Civil Engineering And Urban Planning (Ceup2016) Ahmed Mebarki, 2017-06-02 The 5th International Conference on Civil Engineering and Urban Planning CEUP2016 was held in Xi'an China on August 23-26 2016 CEUP2016 gathered outstanding scientists and researchers worldwide to exchange and discuss new findings in civil engineering and urban planning associated with transportation and environmental topics The conference program committee is also greatly honored to have four renowned experts for taking time off to present their keynotes to the conference The conference had received a total of 410 submissions which after peer review by the Technical Program Committee only 108 were selected to be included in this conference proceedings which covers Architecture and Urban Planning Civil Engineering and Transportation Engineering

Imaginative Structure of the City Alan Blum, 2003-05-07 Blum's distinctive form of theoretical inquiry pushes the reader to move beyond conventional ways of thinking about familiar urban issues in answering such fundamental questions as How does a city exist How do its inhabitants define their relationship to it Who is entitled to speak for it What is its symbolic nature In what way does the city function as a focus of attempts to resolve social problems such as alienation participation and community In what ways do night and nighttime affect our relationship to it How is it possible to speak of a city as both exciting and alienating

A More Perfect Union Linda Sargent Wood, 2012-10-18 This book uncovers a holistic sensibility in post World War II American culture that challenged Cold War logic and fed some of the century's most powerful social movements This impulse is illustrated by focusing on Rachel Carson Buckminster Fuller Martin Luther King Jr Abraham Maslow Pierre Teilhard de Chardin and the Esalen Institute
