Complexity Thinking: Science in the Age of Alternative Truths Cornelis Pieter Pieters, 2024-04-26 Many scholars agree that we are currently living in post ideological times and that the role of religion and social ideology has become increasingly limited as a means to organise society Some even talk of a post truth era as truth itself has become suspect and public debate has become infected with terms such as fake news and alternative truths In fact in many scientific areas the notions of truth objectivity and fact are being questioned and are often even considered instruments that aim to perpetuate relationships of power of elites This book aims to take a position in these debates by looking at the often implicit associations behind truth objectivity and fact By taking a complexity informed dialectical approach a more encompassing understanding of these concepts can be developed that both respects the formidable achievements of science while being sensitive to the critique that has been raised most notably by postmodern thought

The Age of Promiscuity Doru Pop, 2018-11-15 This book presents an original and engaging look at contemporary popular culture opening with the provocative idea that this is a day and age of complete exhaustion of ideas images stories and myths Questioning the effects of content recycling in cinema and other media the author further elaborates on the repurposing of cultural junk the reassembling of narratives and myths The thought provoking hypothesis proposed in this research is that we have entered an age of cultural promiscuity By analyzing the mutations of myth making practices and connecting them with larger cultural manifestations the author explains these transformations as integral to the development of a myth illogical imagination Cinematic and mythological representations in mainstream Hollywood films have reached a point of amalgamation with no return which marks the beginning of a fourth age of representations where signs and meanings are manifested in illogical permutations This is more explicit in films that commingle aliens cowboys undead American presidents and zombie nazis joining together in the same narrative ghosts werewolves and vampires aggregating disjointed storylines and historical fake facts all coalesced in an orgy of empty burlesque and infantile masquerades This interdisciplinary research combines cultural studies film criticism art and myth interpretations bringing into the debate multiple concepts from related fields such as critical theory and media criticism The book also opens up to innovative approaches from a wide array of academic disciplines offering researchers students and those fascinated by the transformations happening in contemporary cinema an interpretative tool based on a revised dialectic approach The

conclusion is that we are now victims of a zombie semiotics Meaning making in contemporary culture politics and aesthetics is dominated by a process of incessant desecration of significations specific to the total mishmash of representations analyzed here
