Littlewood,2017-11-09 The age of Nero has appealed to the popular imagination more than any other period of Roman history This volume provides a lively and accessible guide to the various representations and interpretations of the Emperor Nero as well as to the rich literary philosophical and artistic achievements of his eventful reign The major achievements of the period in the fields of literature governance architecture and art are freshly described and analysed and special attention is paid to the reception of Nero in the Roman and Christian eras of the first centuries AD and beyond Written by an international team of leading experts the chapters provide students and non specialists with clear and comprehensive accounts of the most important trends in the study of Neronian Rome They also offer numerous original insights into the period and open new areas of study for scholars to pursue *Good Words* ,1878 *A New English Dictionary on Historical Principles: part 1. F* (1901) James Augustus Henry Murray,1901 *Slavery and the American Founding* Jude M. Pfister,2025-03-21 Since 1776 the Founding generation has been portrayed as creators of a new world where liberty and freedom were the inherent birthright of all peoples The Founders although brilliant were nonetheless human and fashioned a country conceived in liberty and freedom for themselves The enslaved women and other minorities were not part of the original Founding documents All men created equal was a political statement not some ethereal message of Enlightenment understanding This book demonstrates that to understand the American Founding is to understand the totality of America The American Founding and the so called compromises forged by state delegates to ensure national unity despite existing alternatives that could have rejected enslavement defined the period from 1765 to 1800 and planted the seeds for a horrific civil war Two of the most debated words from the Age of Enlightenment freedom and liberty not only made America independent but also made it dependent on an execrable system rejected by most of the European thinkers who inspired the uprising against Britain *A Cultural History of Tragedy in the Age of Enlightenment* Mitchell Greenberg,2021-05-20 The period covered by this volume in the Cultural History of Tragedy set is bookended by two shockingly similar historical events the beheading of a king Charles I of England in 1649 and Louis XIV of France in 1793 The period between these two dates saw enormous

political social and economic changes that altered European society's cultural life Tragedy which had dominated the European stage at the beginning of this period gradually saw itself replaced by new literary forms culminating in the gradual decline of theatrical tragedy from the heights it had reached in the 1660s The dominance of France's military and cultural prestige during this period is reflected in the important almost exclusive space dedicated in this volume to the French stage This book covers the tragedies of France's two greatest playwrights Pierre Corneille 1606-84 and Jean Racine 1639-99 which would dominate not only the French stage but through translations and adaptations became the model of tragic theater across Europe finding imitators in England Dryden Italy Alfieri and as far afield as Russia This dominance continued well into the 18th century with the triumph of Voltaire's tragedies This volume also examines how the writings of Diderot and Lessing changed the direction of theatre and how after the Revolution in the writings of Goethe Schiller Hegel tragedy and the tragic were reimagined and became the sign of European modernity Each chapter takes a different theme as its focus forms and media sites of performance and circulation communities of production and consumption philosophy and social theory religion ritual and myth politics of city and nation society and family and gender and sexuality

An Introduction to Hegel's Lectures on the Philosophy of Religion Jon Stewart, 2021-12-23 An Introduction to Hegel's Lectures on the Philosophy of Religion examines Hegel's religious thinking by seeing it against the backdrop of the main religious trends in his own day specifically the Enlightenment and Romanticism A basic introduction to Hegel's lectures it provides an account of the criticism of religion by key Enlightenment thinkers such as Voltaire Lessing Hume and Kant This is followed by an analysis of how the Romantic thinkers such as Rousseau Jacobi and Schleiermacher responded to these challenges For Hegel the views of these thinkers from both the Enlightenment and Romanticism tended to empty religion of its content The goal that he sets for his own philosophy of religion is to restore this lost content The book provides a detailed account of Hegel's Lectures on the Philosophy of Religion and argues that the basic ideas of the Enlightenment and Romanticism are still present today and remain an important issue for both academics and non academics regardless of their religious orientation
