Commonplace William Alfred Quayle, 1921 *Corpse Magic* Michael Taussig, 2025-03-28 Corpse Magic examines beliefs about vengeance the slain magically enact on their killers focusing on lethal violence in Colombia and the United States Corpse Magic is a response to the global ubiquity of violence In this bracing new work the influential anthropologist Michael Taussig puts killings in Colombia by gangs and guerrillas police and the military and agents of agribusiness in conversation with mass shootings and police killings disproportionately of Black people in the United States In both contexts he examines the effects of violent killing on its victims its perpetrators and those who witness and relive it through media footage Drawing from literature religion philosophy and anthropology Taussig traces the idea that the act of killing infects the killer and spreads outward then connects this concept of contagion to beliefs in Colombia and elsewhere that the souls of the slain possess those of their slayers and that magic can be used to empower or thwart corpses as agents of vengeance In this powerful and imaginative work Taussig asks what kind of power the dead continue to have what kinds of magic can manage that power and what if anything can stop seemingly endless cycles of violence *Uncommon Senses* Chuck Slaght, 2012-05

Uncommon Friendships William Young, 2010-01-01 Uncommon Friendships explores the often overlooked dynamic of interreligious friendships considering their significance for how we think about contemporary religious thought By exploring the dynamics of three relationships between important religious thinkers Franz Rosenzweig and Eugen Rosenstock Huessey Emmanuel Levinas and Maurice Blanchot and Julia Kristeva and Catherine Clement this study demonstrates the ways such friendships enable innovation and transformation within religious traditions For each pair of thinkers the sustained engagement and disagreement between them becomes central to their religious and philosophical development helping them to respond effectively and creatively to issues and problems facing their communities and societies Through a rereading of

their work Young shows how such friendships can help us rethink religion aesthetics education and politics as well as friendship itself *Uncommon Sense* Alan Cromer,1995-08-24 Most people believe that science arose as a natural end product of our innate intelligence and curiosity as an inevitable stage in human intellectual development But physicist and educator Alan Cromer disputes this belief Cromer argues that science is not the natural unfolding of human potential but the invention of a particular culture Greece in a particular historical period Indeed far from being natural scientific thinking goes so far against the grain of conventional human thought that if it hadn t been discovered in Greece it might not have been discovered at all In *Uncommon Sense* Alan Cromer develops the argument that science represents a radically new and different way of thinking Using Piaget s stages of intellectual development he shows that conventional thinking remains mired in subjective egocentric ways of looking at the world most people even today still believe in astrology ESP UFOs ghosts and other paranormal phenomena a mode of thought that science has outgrown He provides a fascinating explanation of why science began in Greece contrasting the Greek practice of debate to the Judaic reliance on prophets for acquiring knowledge Other factors such as a maritime economy and wandering scholars both of which prevented parochialism and an essentially literary religion not dominated by priests also promoted in Greece an objective analytical way of thinking not found elsewhere in the ancient world He examines India and China and explains why science could not develop in either country In China for instance astronomy served only the state and the private study of astronomy was forbidden Cromer also provides a perceptive account of science in Renaissance Europe and of figures such as Copernicus Galileo and Newton Along the way Cromer touches on many intriguing topics arguing for instance that much of science is essential complete there are no new elements yet to be discovered He debunks the vaunted SETI Search for Extraterrestrial Intelligence project which costs taxpayers millions each year showing that physical limits such as the melting point of metal put an absolute limit on the speed of space travel making trips to even the nearest star all but impossible Finally Cromer discusses the deplorable state of science education in America and suggests several provocative innovations to improve high school education including a radical proposal to give all students an intensive eighth and ninth year program eliminating the last two years of high school *Uncommon Sense* is an illuminating look at science filled with provocative observations Whether challenging Thomas Kuhn s theory of scientific revolutions or extolling the virtues of Euclid s *Elements* Alan Cromer is always insightful outspoken and refreshingly original *Uncommon Sense, Common Nonsense* Jules Goddard,Tony Eccles,2012-05-03 This is a book for managers who know that their organisations are stuck in a mindset that thrives on fashionable business theories that are no more than folk wisdom and whose so called strategies that are little more than banal wish lists It puts forward the notion that the application of uncommon sense thinking or acting differently from other organisations in a way that makes unusual sense is the secret to competitive success For those who want to succeed and stand out from the herd this book is a beacon of uncommon sense and a timely antidote to managerial humbug *Gifts of an Uncommon Life* Howard E. Friend,

Jr.,2008-11-24 This book of ten essays is a breath of fresh air a source of inspiration a wake up call and a bold challenge for pastors congregational leaders and church members both active and lapsed who long for a new perspective even a touch of creative irreverence With an invitation to quietness and stillness inner strength and resilience audacious hope and insistent confidence it welcomes those among the people of God who do not belong to a church or even name themselves as Christian Yet it does not shy away from raising difficult questions Howard Friend offers forthright at times disarming candor as he shares his personal pilgrimage of activism rooted in contemplation Convinced that God still seeks to work in and through the church Friend shows us where God is present at times despite the church itself In his opinion the church needs to stir the pot upset the applecart and dare to welcome the new and refreshing Yet Friend remains hopeful for and committed to the church calling and equipping it to become its highest and best Drawing on a range of stories from the Bible and his own lived experiences Friend invites us to meet real people pastors leaders everyday folks who dare to dream a new dream journey toward a far horizon walk with tireless determination and press on with awesome hope **An Uncommon Vision** Des Moines Art Center,Neal David Benezra,Franz Schulze,Louise Rosenfield Noun,Amy N.
