challenges inequalities while also recognising value and hope This perspective aims to offer a recognition of both the opportunities and challenges of class as a way of developing a stronger more politicised understanding of class which takes solidarity and class community power seriously to resist inequality and develop emancipatory politics This urgent and impassioned book will be essential reading for students academics and activists with an interest in the lived experience of class in Britain today *The Apostolic Word. While many universities particularly in the United States have entrepreneurial finance on their curriculum there is often a gap between the large selection of entrepreneurship courses and courses providing applicable hard skills in finance and accounting Early stage ventures cannot succeed without capital and careful management of cash flow for example Entrepreneurs need skills such as how to negotiate with investors so that they don't end up giving up the control of their venture too early This book aims to fill this gap by providing guidelines for how successful courses can be set up to train finance accounting and corporate strategy students for a career in the start up and venture capital industry
