The Face Of The Nation Immigration The State And The National Identity:

The Face of the Nation Keith Fitzgerald, 1996-04-01 This innovative work provides both a historical account of the crazy quilt of legislation dealing with immigration that Congress has passed over the years and a theoretical explanation building on the new institutionalism of how these laws came to be passed The author shows why immigration is a uniquely revealing policy arena in which a polity chooses what it will be a collective decision that shapes a nation's identity and defines itself The book focuses on three aspects of immigration policy the regulation of admission to the United States for permanent residency the regulation of admission of people fleeing political repression and the efforts to cope with the flow of unsanctioned migrants across the U S Mexico border It identifies the most puzzling features of contemporary immigration policy asking Where do these policies come from Why do they have their special characteristics The author seeks the answers in modern theories of public policy formation especially the currently popular new institutionalism He offers an enhanced version of this approach which he calls improvisational institutionalism and applies it to the paradoxes of immigration policy

We Are All Americans, Pure and Simple Leroy G. Dorsey, 2013-08-28 The turn of the 20th century represented one of the most chaotic periods in the nation's history as immigrants Native Americans and African Americans struggled with their roles as Americans while white America feared their encroachments on national identity This book examines Theodore Roosevelt's public rhetoric speeches essays and narrative histories as he attempted to craft one people out of many Leroy G Dorsey observes that Roosevelt's solution to the problem appeared straightforward everyone could become Americans pure and simple if they embraced his notion of Americanism Roosevelt grounded his idea of Americanism in myth particularly the frontier myth a heroic combination of individual strength and character When nonwhites and immigrants demonstrated these traits they would become true Americans earning an exalted status that they had heretofore been denied Dorsey's analysis illuminates how Roosevelt's rhetoric achieved a number of delicate if problematic balancing acts Roosevelt gave his audiences the opportunity to accept a national identity that allowed some room for immigrants and nonwhites while reinforcing their status as others thereby reassuring white Americans of their superior place in the nation Roosevelt's belief in an ordered and unified nation did not overwhelm his private racist attitudes Dorsey argues but certainly competed with them Despite his private sentiments he recognized that racist beliefs and rhetoric were divisive and bad for the nation's progress The resulting message he chose to propagate was thus one of a rhetorical if not literal melting pot By focusing on Roosevelt's rhetorical constructions of national identity as opposed to his personal exploits or his role as a policy maker We Are All Americans offers new insights into Roosevelt's use of public discourse to bind the nation together during one of the most polarized periods in its history

and Beyond Ethnicity Linas Eriksonas, Leos Müller, 2005 Today's world is a world of nation states few have survived since the early modern period some have existed for three hundred years most came into being during the second part of the last century Yet the equation between the state and the nation does not go back far in history despite the prevailing tendency to view the state as closely linked to ethnicity To challenge the latter this book attempts to examine statehood separately from the concept of ethnicity it asks what is non ethnic about statehood by looking at statehood before and beyond ethnicity A non ethnic statehood is analysed in two forms as a historical phenomenon at the time of the emergence of the early modern state Part One and as a historical tradition which had been pursued by the nation builders in the nineteenth and twentieth centuries Part Two Instead of looking at great powers as traditional models of statehood individual chapters focus on minor and less familiar states in Northern and Eastern Europe from the period c 1600 2000 including Belgium Bohemia Greece the Netherlands Romania Poland Lithuania Serbia and Montenegro Sweden Scotland and Transylvania **The Oxford**
