Artifactual and biological analyses** Thomas C. Windes, 1988 **Swifterbant Stones** Izabel Devriendt, 2014-09-18 In this research the stone and flint artefacts of the site Swifterbant are analysed Attention is focussed on the Neolithic occupation phase of the prehistoric creek system c 4300 4000 cal BC where archaeological traces were found on several levee and river dune sites This study shows that there is a larger variability in site types than originally presumed It is established that these sites are all part of one settlement system in which they all had a different function This thesis comprises a monograph on the research history of the site and the different aspects of the lithic research such as typological analysis technological attribute analysis raw material analysis and use wear analysis in combination with a detailed inventory catalogue All this leads to new insights into the use of lithic artefacts The importance of stone tool morphology the selective gathering of stone tool blanks or the use of two different flint production sequences are but a few of these interesting aspects Other topics concern tool function mobility raw material access and use cultural markers and social identity In combining the results from this research with that of other Swifterbant sites a better understanding of the different aspects of prehistoric stone and flint industries is gained Modelling Behaviour Mette Ramsgaard Thomsen, Martin Tamke, Christoph Gengnagel, Billie Faircloth, Fabian Scheurer, 2015-11-12 This book reflects and expands on

the current trend in the building industry to understand simulate and ultimately design buildings by taking into consideration the interlinked elements and forces that act on them This approach overcomes the traditional exclusive focus on building tasks while posing new challenges in all areas of the industry from material and structural to the urban scale Contributions from invited experts papers and case studies provide the reader with a comprehensive overview of the field as well as perspectives from related disciplines such as computer science The chapter authors were invited speakers at the 5th Symposium Modelling Behaviour which took place at the CITA in Copenhagen in September 2015
