The Accidental Immigrant

David Bouchier, 2004-06 Transatlantic humorist David Bouchier brings wit wisdom and a touch of philosophy to the everyday dramas of American suburban life This book brings together more than a hundred essays originally broadcast on National Public Radio or published in his Out of Order column in the Sunday New York Times When work and marriage brought David Bouchier to Long Island in 1986 the endless suburbs seemed mysterious and exotic to him He was inspired to begin writing essays and newspaper columns about his life there a personal and public diary of the Resident Alien experience In 1992 a weekly public radio essay was added to the newspaper columns and thousands of listeners still enjoy David's weekly radio broadcasts These are the affectionate and sometimes acerbic observations of an Accidental Immigrant who still finds life in America endlessly stimulating and wonderfully strange David Bouchier's thoughts about love life liberty and the pursuit of happiness in the suburbs will make you smile and make you think Boring suburban rituals like lawn care mall shopping wedding rehearsals and barbecues will never seem the same again

Lifting Depression Kelly Lambert, Kelly Lambert Ph D, 2010-10-08 Drawing on the latest findings from neuroscience as well as cultural observation and her own unique laboratory research psychologist Kelly Lambert puts forth a provocative new theory about the cause and treatment of depression Today's young adults are up to ten times more likely to experience depression than their grandparents were Could it be that in our increasingly automated world the reduced physical effort needed to accomplish anything may somehow interfere with our level of happiness and subsequent responses to stress Neuroscientist Kelly Lambert finds compelling evidence that having to work hard for rewards significantly improves mood and prevents depression Beginning with her innovative research on rats she compared trust

fund rats whose rewards came with no effort on their part to hard working trained to succeed rodents Lambert offers hope of treatment for people without debilitating and often ineffective drugs Drawing on a wealth of information from the fields of anthropology neuroscience and evolutionary psychology Lambert develops a unique theory suggesting that physical effort directed toward tangible outcomes activates particular regions of the brain and builds resilience against the emotional emptiness and negative thinking associated with depression Whereas most therapies emphasize the importance of mental activity Lambert reminds us of the importance of physical activity in establishing control in a fast paced culture that is focused more on the prospect of immediate gratification than savoring the fruits of our labor **Metabolism and**
