The Achievements Of Memory:

The Achievements of Memory Harry Guest, 1974 *The Achievement of Brian Friel* Alan J. Peacock, 1993 The reception of Brian Friel's recent *Dancing at Lughnasa* confirms his status as Ireland's leading dramatist. The body of work that he has produced is outstanding in its breadth of sympathy and interest, its dramaturgical invention and its wide cultural and intellectual purview. At one level it may be seen as a continuous examination of Irish culture and politics, committed and analytical but not sectionally propagandist. His outlook in his drama, however, is not amenable to simplistic categorization, political or otherwise. As this volume demonstrates, linguistically allusively and in terms of its broad transcultural analogising, his work ranges widely. He utilises ideas and terminologies drawn from various cultural sources and academic disciplines in a way that exemplifies his central insistent concern with the phenomenon of language and its implications. As an Irish dramatist, however, he makes Irish social, political and notably family life his focus and builds upon a recognised tradition of twentieth-century Irish play writing. This book addresses the variety and complexity of Friel's drama by bringing to bear a range of academic and other professional and creative approaches in order to highlight particular aspects of his work and thought. Hence contributors include a playwright, poet, theatre producer, historian and various specialists in relevant literatures. In this way the book suggests the intellectual richness, humanity and protean skill and invention of the work. *The Achievement of Wendell Berry* Fritz Oehlschlaeger, 2011-06-24 Arguably one of the most important American writers working today, Wendell Berry is the author of more than fifty books, including novels and collections of poems, short stories and essays. A prominent spokesman for agrarian values, Berry frequently defends such practices and ideas as sustainable agriculture, healthy rural communities, connection to place, the pleasures of work and the interconnectedness of life. In *The Achievement of Wendell Berry: The Hard History of Love*, Fritz Oehlschlaeger provides a sweeping engagement with Berry's entire corpus. The book introduces the reader to Berry's general philosophy and aesthetic through careful consideration of his essays. Oehlschlaeger pays particular attention to Berry as an agrarian citizen and patriot and also examines the influence of Christianity on Berry's writings. Much of the book is devoted to lively close readings of Berry's short stories, novels and poetry. *The Achievement of Wendell Berry* is a comprehensive introduction to the philosophical and creative world of Wendell Berry, one that offers new critical insights into the writing of this celebrated Kentucky author. **The Digitalisation of Memory Practices in China** Maximilian Mayer, Frederik Schmitz, 2025-09-29 How is memory in China curated in the digital era? This pioneering volume investigates the transformation of collective memory in China amid rapid technological change. Introducing the concept of the curating state, it reveals how digitalisation both supports and challenges official memories, giving rise to more hybrid and at times democratised memory practices. Bringing together leading Chinese and international scholars, the book examines the use of digital tools by state, private and commercial actors to curate their own versions of the past. Combining theoretical innovation with rich empirical research, this is a vital resource for understanding the dynamic interplay between memory

media and power in contemporary China and beyond **Peacebuilding and Memory in the Philippines** Primitivo III Cabanes Ragandang, 2025-06-06 This book critically examines community resilience within peace and conflict studies By focusing on the complexities of resilience in the ay m ay mic political order in the Philippines it shows how memories experiences and intergenerational dialogue shape resilience strategies across time and space Through theoretical analysis and case studies the book challenges conventional understandings of resilience by highlighting its complex intersections with agency resistance and political survival It delves into the role of resource scarcity trauma and shifting socio political landscapes in shaping resilience strategies offering a nuanced perspective beyond its often romanticized portrayal By bridging theoretical debates with real world insights it provides a fresh framework for understanding resilience as both a political and social process This book is an essential resource for scholars practitioners and policymakers engaged in peacebuilding governance and conflict transformation *Memory's Milestones* Percy Frazer Smith, 1918 *The Achievement of William Styron* Robert K. Morris, Irving Malin, 2008-06-01 The publication of Sophie s Choice one of William Styron s greatest literary achievements generated a new spark in the critical discussion of the author and is the main emphasis of the interview with Styron and one of the additional essays in this revised edition The interview was conducted by Robert K Morris the essay on Sophie s Choice by Richard Pearce Other essays include Jane Flanders on Styron s southern myth Philip W Leon on Styron s narrative technique and Ardner R Cheshire Jr and Mary S Strine on The Confessions of Nat Turner Originally published in 1975 The Achievement of William Styron was the first collection of critical essays on one of America s most distinguished contemporary fiction writers and it has become a standard work Essays from the original edition which are included in this revised edition are those by the editors and by Louis D Rubin Jr John O Lyons Jan B Gordon Robert Phillips and George Core **Noncognitive psychological processes and academic achievement** Jihyun Lee, Lazar Stankov, 2017-10-02 It is becoming increasingly clear that non cognitive psychological processes are important for students school achievement even to the point where their influence may be stronger than that exerted by the parents teachers or the school atmosphere itself Non cognitive psychological variables refer to varieties of self beliefs and goal orientations such as anxiety confidence self efficacy and self concept which are often seen as dispositional and motivational in nature It is particularly important to highlight the role that confidence and self efficacy play in school achievement as these two self beliefs are related to metacognitive processing the awareness of what you know and what you do not know Self concept meanwhile tends to exert its influence on an individual s choice of tertiary level courses This book suggests that by focusing on students self beliefs the education system may be in a position to improve cognitive performance since individual students self beliefs may be more malleable than the cognitive processes involved in acquiring academic knowledge Focusing on these non cognitive psychological processes is also likely to be more effective in improving performance than system wide interventions involving changes in policy for both public and private sector educators This book will be useful to educational

researchers school leaders administrators counsellors and teachers in guiding students attitudes towards learning and school performance It will also provide students in psychology and education with broad and nuanced insights into the drivers of school achievement This book was originally published as a special issue of Educational Psychology
