Managing forests in displacement settings Food and Agriculture Organization of the United Nations, United Nations Refugee Agency, 2018-06-20

The massive increase in demand for woodfuel for cooking caused by sudden influxes of refugees and other displaced people is usually the main driver of forest degradation and deforestation in displacement settings It places enormous pressure on nearby forests and woodlands and is often a source of tension between the host and displaced communities A lack of sufficient cooking fuel also has an impact on the nutrition and health of vulnerable people in such settings This document aims to contribute on a sustainable forest management in displacement settings for building resilience and laying the basis for long term solutions In particular well planned forestry interventions can ensure a sustainable supply of woodfuel timber and non wood forest products for those communities thereby helping ensure their well being
