Michael Hiam, 2014-10-07 Here is the story of airships manmade flying machines without wings from their earliest beginnings to the modern era of blimps In postcards and advertisements the sleek silver cigar shaped airships or dirigibles were the embodiment of futuristic visions of air travel They immediately captivated the imaginations of people worldwide but in less than fifty years dirigible became a byword for doomed futurism an Icarian figure of industrial hubris *Dirigible Dreams* looks back on this bygone era when the future of exploration commercial travel and warfare largely involved the prospect of wingless flight In *Dirigible Dreams* C Michael Hiam celebrates the legendary figures of this promising technology in the late nineteenth and early twentieth centuries the pioneering aviator Alberto Santos Dumont the doomed polar explorers S A Andr e and Walter Wellman and the great Prussian inventor and promoter Count Ferdinand von Zeppelin among other pivotal figures and recounts fascinating stories of exploration transatlantic journeys and floating armadas that rained death during World War I While there were triumphs such as the polar flight of the Norge most of these tales are of disaster and woe culminating in perhaps the most famous disaster of all time the crash of the Hindenburg This story of daring men and their flying machines dreamers and adventurers who pushed modern technology to and often beyond its limitations is an informative and exciting mix of history technology awe inspiring exploits and warfare that will captivate readers with its depiction of a lost golden age of air travel Readable and authoritative enlivened by colorful characters and nail biting drama *Dirigible Dreams* will appeal to a new generation of general readers and scholars interested in the origins of modern aviation **Zeppelin** Andrew Donkin, 2000 Traces the history of the Zeppelin airship or blimp describing triumphant successes and tragic failures *His Majesty's Airship* S C Gwynne, 2024-05-21 The tragic story of the British airship R101 which went down in a spectacular hydrogen fueled fireball in 1930 killing more people than died in the Hindenburg disaster seven years later has been largely forgotten In *His Majesty's Airship* historian S C Gwynne resurrects it

in vivid detail telling the epic story of great ambition gone terribly wrong Airships those airborne leviathans that occupied center stage in the world in the first half of the twentieth century were a symbol of the future R101 was not just the largest aircraft ever to have flown and the product of the world's most advanced engineering she was also the lynchpin of an imperial British scheme to link by air the far flung areas of its empire from Australia to India South Africa Canada Egypt and Singapore No one had ever conceived of anything like this R101 captivated the world There was just one problem beyond the hype and technological wonders these big steel framed hydrogen filled airships were a dangerously bad idea Gwynne's chronicle features a cast of remarkable and often tragically flawed characters including Lord Christopher Thomson the man who dreamed up the Imperial Airship Scheme and then relentlessly pushed R101 to her destruction Princess Marthe Bibesco the celebrated writer and glamorous socialite with whom he had a long affair and Herbert Scott a national hero who had made the first double crossing of the Atlantic in any aircraft in 1919 eight years before Lindbergh's famous flight but who devolved into drink and ruin These historical figures and the ship they built flew and crashed come together in a grand tale that details the rocky road to commercial aviation written by one of the best popular historians writing today **The**

Devalaya Review, 1920 **Umberto Nobile And the Arctic Search for the Airship Italia** Garth Cameron, 2017-09-09 By the time it was over eight of the crew and nine rescuers were dead and scores more had been put in harm's way The disappearance and search for the airship Italia was headline news all over the world for months after its last radio message on 25 May 1928 It had reported being to the north east of its base at Kings Bay on the Arctic island of Spitsbergen returning from a long flight to Greenland and the North Pole Ships aircraft and men from many countries converged on Kings Bay to participate in the rescue effort The Italian airship designer and pilot Umberto Nobile had flown to the North Pole and beyond in 1926 He resolved to return to the Arctic with a new airship in 1928 The expedition had geographical and scientific aims but the political environment was also an important motivator Benito Mussolini and his fascist party had come to power in 1922 and a successful expedition to the Arctic would be excellent propaganda **Blimp Adventures** Amelia
