The Aid Relationship In Zambia A Conflict Scenario:

The Aid Relationship in Zambia Oliver S. Saasa, Jerker Carlsson, 1996 Does aid work This book examines this issue But rather than trying to establish how effective aid has been the focus is shifted towards one of the key determinants of effectiveness the aid relationship The study looks at the relationship between Zambia and its donors and discusses the likely impact of aid in a country where poverty has become rampant and the international debt has reached unmanageable proportions

Aid and Poverty Reduction in Zambia Oliver S. Saasa, Jerker Carlsson, 2002 Zambia a once prosperous African country now has 73 per cent of its people below the poverty line and by the early 1990s the country was included on the list of the least developed countries Despite significant aid volumes and structural reforms the country is getting deeper and deeper into poverty What is the missing link between aid and positive change Is the problem mainly that the volume of aid is not sufficient and as is often heard more of it would make a difference Has the sluggish social and economic progress in Zambia been appropriately diagnosed and correct remedies and strategies prescribed This book attempts to address these and related questions

The Samaritan's Dilemma Clark C. Gibson, Krister Andersson, The late Elinor Ostrom, Sujai Shivakumar, 2005-09-08 What s wrong with foreign aid Many policymakers aid practitioners and scholars have called into question its ability to increase economic growth alleviate poverty or promote social development At the macro level only tenuous links between development aid and improved living conditions have been found At the micro level only a few programs outlast donor support and even fewer appear to achieve lasting improvements The authors of this book argue that much of aid s failure is related to the institutions that structure its delivery These institutions govern the complex relationships between the main actors in the aid delivery system and often generate a series of perverse incentives that promote inefficient and unsustainable outcomes In their analysis the authors apply the theoretical insights of the new institutional economics to several settings First they investigate the institutions of Sida the Swedish aid agency to analyze how that aid agency s institutions can produce incentives inimical to desired outcomes contrary to the desires of its own staff Second the authors use cases from India a country with low aid dependence and Zambia a country with high aid dependence to explore how institutions on the ground in recipient countries also mediate the effectiveness of aid Throughout the book the authors offer suggestions about how to improve aid s effectiveness These suggestions include how to structure evaluations in order to improve outcomes how to employ agency staff to gain from their on the ground experience and how to engage stakeholders as owners in the design resource mobilization learning and evaluation processes of development assistance programs
