The American Firehouse An Architectural And Social History:

The Firehouse Rebecca Zurier,1991 Public Markets and Civic Culture in Nineteenth-Century America Helen Tangires,2020-03-24 Originally published in 2003 In Public Markets and Civic Culture in Nineteenth Century America Helen Tangires examines the role of the public marketplace social and architectural as a key site in the development of civic culture in America More than simply places for buying and selling food Tangires explains municipally owned and operated markets were the common ground where citizens and government struggled to define the shared values of the community Public markets were vital to civic policy and reflected the profound belief in the moral economy the effort on the part of the municipality to maintain the social and political health of its community by regulating the ethics of trade in the urban marketplace for food Tangires begins with the social architectural and regulatory components of the public market in the early republic when cities embraced this ancient system of urban food distribution By midcentury the legalization of butcher shops in New York City and the incorporation of market house companies in Pennsylvania challenged the system and hastened the deregulation of this public service Some cities demolished their marketing facilities or loosened restrictions on the food trades in an effort to deal with the privatization movement However several decades of experience with dispersed retailers suburban slaughterhouses and food transported by railroad proved disastrous to the public welfare prompting cities and federal agencies to reclaim this urban civic space **Architecture and Fire** Stamatis Zografos,2019-06-12

Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London s Grenfell Tower in 2017 Zografos concludes with thoughts on Freud s drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda **Architecture and Fire** is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines **American Studies** Jack Salzman,1986-08-29 This is an annotated bibliography of 20th century books

through 1983 and is a reworking of American Studies An Annotated Bibliography of Works on the Civilization of the United States published in 1982 Seeking to provide foreign nationals with a comprehensive and authoritative list of sources of information concerning America it focuses on books that have an important cultural framework and does not include those which are primarily theoretical or methodological It is organized in 11 sections anthropology and folklore art and architecture history literature music political science popular culture psychology religion science technology medicine and sociology Each section contains a preface introducing the reader to basic bibliographic resources in that discipline and paragraph length non evaluative annotations Includes author title and subject indexes ISBN 0 521 32555 2 set 150 00 **By**

Design 2 ,1989 **On the Frontlines of the Welfare State** Barry Goetz,2017-02-17 Although public safety agencies protect our well being they also shape social problems and community inequities Public safety protections promote what T H Marshall called social rights of equitable citizenship Frontlines of Welfare State shows how public safety agencies function as welfare state agencies responsible for a range of essential public functions including emergency service criminal investigation regulatory oversight and social service outreach Furthermore this volume shows how public safety agencies are being asked to absorb more social welfare functions amidst cut backs in other areas of the welfare state Two areas of public safety are examined arson control and fire prevention especially within the contexts of urban change and gentrification and community policing especially as a mechanism of expanding drug treatment service and prevention programs Facilitating a greater understanding of institutional biases within the state built around organizational structures procedures and cultures and their impact on social outcomes this original and exciting book will be of interest to researchers practitioners and undergraduate and postgraduate students in the fields of Policing and Fire Control Public Policy and Administration Drugs and Substance Abuse and White Collar Crime **Performing Disunion** Lawrence T. McDonnell,2018-06-21 This book traces how and why the secession of the South during the American Civil War was accomplished at ground level through the actions of ordinary men Adopting a micro historical approach Lawrence T McDonnell works to connect small events in new ways he places one company of the secessionist Minutemen in historical context exploring the political and cultural dynamics of their choices Every chapter presents little known characters whose lives and decisions were crucial to the history of Southern disunion McDonnell asks readers to consider the past with fresh eyes analyzing the structure and dynamics of social networks and social movements He presents the dissolution of the Union through new events actors issues and ideas illuminating the social contradictions that cast the South s most conservative city as the radical heart of Dixie **The Fear of Sinking** Paulette D. Kilmer,1996 In this provocative study Paulette D Kilmer examines the ways in which the national preoccupation with success and its attendant anxieties have been manifested in popular culture Her focus is on the late nineteenth and early twentieth centuries an era in which industrial growth and urbanization wrought enormous changes in the country **Journal of the Society of Architectural Historians** Society of Architectural Historians,1983 Includes

special issues **Eating Smoke** Mark Tebeau, 2012-09-01 During the period of America's swiftest industrialization and urban growth fire struck fear in the hearts of city dwellers as did no other calamity Before the Civil War sweeping blazes destroyed more than 200 million in property in the nation's largest cities Between 1871 and 1906 conflagrations left Chicago Boston Baltimore and San Francisco in ruins Into the twentieth century this dynamic hazard intensified as cities grew taller and more populous confounding those who battled it Firefighters death defying feats captured the popular imagination but too often failed to provide more than symbolic protection Hundreds of fire insurance companies went bankrupt because they could not adequately deal with the effects of even smaller blazes Firefighters and fire insurers created a physical and cultural infrastructure whose legacy in the form of heroic firefighters insurance policies building standards and fire hydrants lives on in the urban built environment In *Eating Smoke* Mark Tebeau shows how the changing practices of firefighters and fire insurers shaped the built landscape of American cities the growth of municipal institutions and the experience of urban life Drawing on a wealth of fire department and insurance company archives he contrasts the invention of a heroic culture of firefighters with the rational organizational strategies by fire underwriters Recognizing the complexity of shifting urban environments and constantly experimenting with tools and tactics firefighters fought fire ever more aggressively eating smoke when they ventured deep into burning buildings or when they scaled ladders to perform harrowing rescues In sharp contrast to the manly valor of firefighters insurers argued that the risk was quantifiable measurable and predictable Underwriters managed hazard with statistics maps and trade associations and they eventually agitated for building codes and other reforms which cities throughout the nation implemented in the twentieth century Although they remained icons of heroism firefighters cultural and institutional authority slowly diminished Americans had begun to imagine fire risk as an economic abstraction By comparing the simple skills employed by firefighters climbing ladders and manipulating hoses with the mundane technologies maps and accounting charts of insurers the author demonstrates that the daily routines of both groups were instrumental in making intense urban and industrial expansion a less precarious endeavor
