The Environment And Marxism Leninism The Soviet And East German Experience:

The Environment And Marxism-leninism Joan Debardeleben,1985-05-20 **The Environment And Marxism-leninism** Joan Debardeleben,2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself **The Environment and Marxism-Leninism** Joan DeBardeleben,1982 **The East German Economy** ,1964 **The East German Economy** Ian Jeffries,Manfred Melzer,Eleonore Breuning,2017-06-14 Originally published in 1987 this book brings together leading authorities from Germany and the USA who analyze how the East German economy actually operated planning and management pricing investment and innovation the financial system agriculture and foreign trade including the special concessions granted by the then Federal Republic of Germany The volume is an insightful study of one of the least studied and most successful of socialist economies **A Companion to Global Environmental History** J. R. McNeill,Erin Stewart Mauldin,2025-04-21 Offers multiple points of entry into the dynamic and fast growing field of Global Environmental History to specialists and newcomers alike Companion to Global Environmental History provides the cultural intellectual and political context for engagement with the environment in contemporary times Presenting carefully selected essays by both pioneers in the field and younger scholars this timely volume explores the many contours of the relationship between human societies and the natural world on which they depend Divided into four sections the Companion opens by describing how the relationship between society and nature has evolved over time followed by a series of regional and national histories that illustrate how the pieces of the global puzzle fit together The third section examines various drivers of environmental transformations across place and time such as technology colonialism industrial agriculture and climate change The final section surveys different types of environmental thought and action around the world addressing the relationship between religion and the environment environmental movements in China the history of environmentalism in Brazil and more The expanded second edition of the Companion to Global Environmental History features six entirely new chapters on India China

Africa early modern cities global environmental governance and European environmentalism The remainder of the book is extensively revised throughout including up to date coverage of agriculture industrialization climate and biological exchanges An invaluable road map to the field s past developments current controversies and future possibilities Companion to Global Environmental History Covers a uniquely broad range of temporal geographic thematic and contextual approaches Presents new evidence for longstanding debates and innovative applications of environmental history Offers fresh insights into environmental thought and culture as well as environmental policy and politics around the world Brings together an international roster of environmental historians from nations including Brazil Germany Canada Switzerland Spain Australia the Netherlands Bangladesh and China Contains comparative perspectives and approaches to the subject sometimes with differing purposes and contrasting conclusions Companion to Global Environmental History Second Edition is an essential reference to current issues and controversies within the field It is an excellent textbook for undergraduate and graduate courses in the subject a handy guide for newcomers to the field as well as an invaluable resource for scholars researchers and environmental historians who want to expand or deepen their knowledge

Environmental Problems in East-Central Europe Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth s resources

The People's Own Landscape Scott Moranda, 2014-01-21 An exploration of East German tourist practices of the 1970s and 1980s provides new insight into the country s environmental politics

The Soviet Environment John Massey Stewart, 1992-05-07 This book originally published in 1992 describes the Soviet

environment at its crisis point in the late 1980s and early 1990s. Belarus and the Ukraine had as a result of the Chernobyl accident been declared ecological disaster zones and across the country as a whole as many as 20 per cent of the population lived in environmental danger areas and another 35-40 per cent in unsatisfactory conditions. According to a Supreme Soviet Environment Committee report of 1989, 80% of all illness in the USSR related either directly or indirectly to environmental problems. In this book leading specialists from both the West and the Soviet Union present a comprehensive analysis of these problems. The contributors examine the aftermath of Chernobyl, the catastrophic causes and effects of the Aral Sea's shrinkage, the environmental issues and public unrest. The depth of analysis in this volume together with the breadth of topics addressed will ensure that it is read by students and specialists of the Soviet Union and environmental issues as well as by all government officials, journalists and industrialists with an interest in the Soviet environment.

The Environment and World History Edmund Burke III, Kenneth Pomeranz, 2009-04-08

Since around 1500 C.E. humans have shaped the global environment in ways that were previously unimaginable. Bringing together leading environmental historians and world historians, this book offers an overview of global environmental history throughout this remarkable 500-year period. In eleven essays, the contributors examine the connections between environmental change and other major topics of early modern and modern world history: population growth, commercialization, imperialism, industrialization, the fossil fuel revolution, and more. Rather than attributing environmental change largely to European science, technology, and capitalism, the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world, leading to intensified exploitation of land and water. The wide range of regional studies, including some in Russia, China, the Middle East, India, Southeast Asia, Latin America, Southern Africa, and Western Europe, together with the book's broader thematic essays, makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history.
