

Ohm's Law Practice Problems

Using Ohm's Law, solve the following problems. Be sure to show all work. **Formula: V (voltage) = I (current) $\times$ R (resistance)**

1. What is the voltage if a resistance of $25\ \Omega$ produces a current of 250 amperes?

2. What is the current produced by a voltage of 240 V through a resistance of $0.2\ \Omega$?

3. What voltage is necessary to produce a current of 200 amperes through a resistance of $100\ \Omega$?

4. What resistance would produce a current of 120 amps from a 6-V battery?

5. What is the current produced by a 9-V battery flowing through a resistance of $200\ \Omega$?

6. What voltage produces a current of 500 amps with a resistance of $50\ \Omega$?

7. What resistance would produce a current of 200 amps with a voltage of 2,000 V?

8. What is the current produced with a 9-V battery through a resistance of $100\ \Omega$?

EU International Relations Law Panos Koutrakos, 2006-04-14 In the post 9 11 world the European Union has been trying to define its international presence in a way which corresponds to its economic power and enlarged membership In an effort to assert its identity on the international scene it has developed a very wide range of economic relations with third countries and international organisations It has also developed a Common Foreign and Security Policy in the context of which it is gradually shaping its Security and Defence Policy These policies are carried out on the basis of distinct albeit interrelated sets of legal rules This book provides a comprehensive and systematic analysis of these economic political and security aspects of the relations of the European Union with the rest of the world It examines their genesis development and interactions and places them in the specific context of the establishment of the internal market and the broader context of the increasingly interdependent international economic and geopolitical environment Issues covered include the coexistence of Community and national competence in external relations the approach of the Court of Justice to international law the negotiation conclusion and implementation of international agreements the relationship between EC and WTO law and the development of the political and security policies of the Union The book will be of interest to academics practitioners and students of EU law

Health Law and the European Union Tamara K. Hervey, Jean V. McHale, 2004-11-04 How does the law of the European Union affect health law and policy At first sight it seems limited However despite its restricted formal competence the EU has recently become increasingly involved in the health field Litigation based on EU law has resulted in a right to receive health care services across national boundaries which may have huge practical implications for national health systems The EU has promulgated legislation regulating clinical research and the marketing of pharmaceuticals patients rights are affected by EU legislation on data protection and product liability the qualifications of health care professionals are legally recognised across the EU and the EU has acted to promote public health This book explores the various impacts of measures of EU law on national health law and policy Through elaboration of selected examples the authors show that within the EU health law cannot be regarded as a purely national affair

EU External Relations Law Piet Eeckhout, 2012-08-23 The law of the external relations of the European Union is a subject of great importance The EU institutions have developed an extensive practice in this area by concluding many international agreements by participating in the work of international organizations and by legislating and regulating on matters of external relations It is a practice giving rise to many legal problems and questions as evidenced by the substantial and fast expanding body of case law in this area from the EU Courts These problems and questions are often of constitutional significance and the external relations law of the EU therefore occupies an important place in the overall constitutional and institutional development of the EU This volume examines the legal foundations of the EU s external relations It focuses on the EU s external competences and objectives on the instruments principles and actors of external policies and on the legal effects of international agreements

and international law It analyses a number of key external policies particularly in the fields of trade and foreign policy Substantially updated to take into account recent case law it also incorporates an examination of the changes made by the Lisbon Treaty This new edition formerly published as External Relations of the European Union Legal and Constitutional Foundations is an invaluable asset to those studying and working in the field A Concise Guide to the EU Anti-dumping/anti-subsidies Procedures Themistoklis K. Giannakopoulos, 2006-01-01 Unfair trading practices such as dumping and the granting of subsidies have long been identified as threats to open markets Yet despite decades of international trading rules global markets are still jeopardized by practices which can cause material injury to industries and put employment at risk The European Union has been a leader in its determination to ensure that its industries are not disadvantaged by such practices that Community interests are defended and that fair competition is restored where needed The basic texts which form the legal basis of anti dumping and anti subsidy investigations in the Community entered into force in 1996 and 1997 The procedures developed in these texts as amended and in their corresponding regulations are the subject of this extremely helpful guide Practitioners who must follow these often complex procedures will find precise guidelines for the substantive determinations that must be made such as calculating the material injury determining the cause of injury and applying the Community interest test and then be able to move confidently through every procedural step including the following Initial complaint Questionnaires Confrontation meetings and oral hearings Investigations by Commission official Offer and acceptance rejection of undertaking Commenting on the Commission's provisional decision Requesting review of measures and refunds and Judicial review Throughout the presentation the author describes relevant cases and actual measures taken Tables of cases and measures as well as a bibliography are included Business people and their counsel whether engaged in trade within the EU or between any country and an EU Member State will benefit enormously from the detailed guidance offered in this incomparable volume The book will also be invaluable to academics and policymakers as an unclouded analysis of anti dumping anti subsidies procedures under EC law **The Interface between Competition and the Internal Market** Vasiliki Brisimi, 2014-12-01 This book explores the interface between competition law and market integration in the application of Article 102 of the Treaty on the Functioning of the European Union TFEU focusing on the notion of market separation namely conduct that may hinder cross border trade The discussion reviews among other things the treatment of geographic price discrimination and exclusionary abuse by which out of state competitors are affected Market separation cases are treated in the book as a case study for appraising the interface between competition and the Internal Market On this basis the book provides a comparative analysis of the Treaty requirements under Article 102 TFEU when applied in market separation cases and the Treaty requirements under the free movement provisions In addition it utilises market separation cases as a springboard for advancing an informed reformulation of the application of Article 102 TFEU when state action comes into play All in all the analysis presented in the

book deconstructs the elements for establishing market separation as an abuse of the dominant position It shows that there is nothing that would justify a distinctive treatment of market separation under Article 102 TFEU other than a principled understanding of Internal Market law as a whole whatever understanding one reaches about the proper shape of the Internal Market interrogation of the proper application of competition law comes after that and thus should be informed by this understanding

The Optimal Enforcement of EC Antitrust Law: A Study in Law and Economics Wouter Wils, 2002-02-13 This text provides clear answers to the major questions concerning the modernization of EC antitrust enforcement such as should a notification system be maintained or should the antitrust rules be enforced exclusively through deterrence and at what levels should fines be set

EC Trade Law Following China's Accession to the WTO Jan Hoogmartens, 2004-01-01 The World Trade Organisation cannot be deemed truly international without the full participation of China a massive market with an increasing number of highly sophisticated sectors Yet although China did accede to the WTO in 2001 after fifteen years of negotiations WTO members persist in classifying China as a non market economy with all the trade restrictions such labelling entails The EC in particular continues to curtail the flow of Chinese European trade despite some recent liberalisation in EC import and antidumping regulations In this important book Dr Hoogmartens clearly points the way to an equitable resolution of the complex problems raised by the friction between China's planned economy and EC trade policy instruments The economic interface he constructs takes account of such crucial elements as the following China's unfinished legal and economic reforms the danger that the EC may develop an abusive protectionist stance the challenge to the EC of increased Chinese competition the persistence of Chinese state owned enterprises the absence of a satisfactory methodology to deal with the Chinese variant of a non market economy the possible adjustment of EC antidumping regulations vis vis China emergency safeguards the role of the rule of law in trade regulation and the translatability of Western social and political institutions Addressing as it does a highly salient present and future aspect of the global economy EC Trade Law Following China's WTO Accession will be of enormous value to policymakers in international economic law at all national and supranational levels The author's reasoned and cautious analysis builds a sound platform for the ongoing development of peaceful and mutually beneficial commercial relations between Europe and China

The European Model of Agriculture Michael Cardwell, 2004 Michael Cardwell's study assesses whether the EU can create a new legislative framework that is feasible and which will placate the WTO and its drive towards world domination
