Boundaries Peter Sahlins, 2023-04-28 This book is an account of two dimension of state and nation building in France and Spain since the seventeenth century the invention of a national boundary line and the making of Frenchmen and Spaniards It is also a history of Catalan rural society in the Cerdanya a valley in the eastern Pyrenees divided between Spain and France in 1659 This study shuttles between two levels between the center and the periphery It connects the macroscopic political and diplomatic history of France and Spain from the Old Regime monarchies to the national territorial states of the later nineteenth century and the molecular history the historical ethnography of Catalan village communities rural nobles and peasants in the borderland On the frontier these two histories come together and they can be told as one This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact

Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 This book is an account of two dimension of state and nation building in France and Spain since the seventeenth century the invention of a national boundary line and the making of Frenchmen and Spaniards It is also a history of Catalan rural society in Identity and Experience at the India-Bangladesh Border Debdatta Chowdhury,2018-06-28 The effects of the partition of India in 1947 have been more far reaching and complex than the existing partition narratives of violence and separation reveal The immediacy of the movement of refugees between India and the newly formed state of Pakistan overshadowed the actual effect of the drawing of the border between the two states The book is an empirical study of border narratives across the India Bangladesh border specifically the West Bengal part of India s border with Bangladesh It tries to move away from the perpetrator state victim civilian framework usually used in the studies of marginal people and looks at the kind of agencies that the border people avail themselves of Instead of looking at the border as the periphery the book looks at it as the line of convergence and negotiations the centre of the people who survive it every day It shows that various social political and economic identities converge at the borderland and is modified in unique ways by the spatial specificity of the border thus forming a border identity and a border consciousness Common sense of the civilians and the state machinery embodied in the border guards collide cooperate and effect each other at the borderlands to form this unique spatial consciousness It is the everyday survival strategies of the border people which aptly reflects this consciousness rather than any universal border theory or state centric discourses about the borders A bottom up approach is of utmost importance in order to understand how a spatially unique area binds diverse other identities into a larger spatial identity of a border people The book s relevance lies in its attempt to explore such everyday narratives across the Bengal border while avoiding any major theorising project so as not to choke the potential of such experience centred insights into the lives of a unique community of people In that it contributes towards a study of borders globally providing potential approaches to understand border people worldwide Based on detailed field research this book brings a fresh approach to the study of this border It will be of interest to researchers in the field of South Asian studies citizenship development governance and border studies
