The Exurbanites:

The Exurbanites Auguste C. Spector, 1955 **Men in the Middle** James Gilbert, 2005-07 While the 1950s have been popularly portrayed on television and in the movies and literature as a conformist and conservative age the decade is better understood as a revolutionary time for politics economy mass media and family life Magazines films newspapers and television of the day scrutinized every aspect of this changing society paying special attention to the lifestyles of the middle class men and their families who were moving to the suburbs newly springing up outside American cities Much of this attention focused on issues of masculinity both to enforce accepted ideas and to understand serious departures from the norm Neither a period of male crisis nor yet a time of free experimentation the decade was marked by contradiction and a wide spectrum of role models This was in short the age of Tennessee Williams as well as John Wayne In *Men in the Middle* James Gilbert uncovers a fascinating and extensive body of literature that confronts the problems and possibilities of expressing masculinity in the 1950s Drawing on the biographies of men who explored manhood either in their writings or in their public personas Gilbert examines the stories of several of the most important figures of the day revivalist Billy Graham playwright Tennessee Williams sociologist David Riesman sex researcher Alfred Kinsey Playboy literary editor Auguste Comte Spector and TV sitcom dad Ozzie Nelson and allows us to see beyond the inherited stereotypes of the time Each of these stories in Gilbert's hands adds crucial dimensions to our understanding of masculinity the 1950s No longer will this era be seen solely in terms of the conformist man in the gray flannel suit or the Marlboro Man **Articulating Hidden**

Histories Jane Schneider, Rayna Rapp, 1995-01-09 Explores the full range of Eric R Wolf's methods and concepts and pays tribute to his work in anthropology and history *The Exurbanites* Auguste C. Spector, 1958 *Guns in America* Jan E. Dizard, Robert Muth, Stephen P. Andrews, 1999-04 Should you own a gun Americans losing trust in each other and institutions Arms and the woman a feminist reappraisal Guns are the tools by which we forge our liberty Gun control in American a history of discrimination against the poor and minorities Talk at Temple Beth Shir Shalom Friday April 30 1993 Apocalypse now They've had enough Author's call to arms gets answer The anti-environment connection America's only realistic option promoting responsible gun ownership What are the alternative Lawsuit aims at gun industry Crime fighting's about face Second thoughts on the Second Amendment Ten essential observations on guns in America *The Rural-urban Fringe in Canada* Kenneth B. Beesley, 2010 *A Comparative Political Ecology of Exurbia* Laura E. Taylor, Patrick T.

Hurley, 2016-05-26 This book is about politics and planning outside of cities where urban political economy and planning theories do not account for the resilience of places that are no longer rural and where local communities work hard to keep from ever becoming urban By examining exurbia as a type of place that is no longer simply rural or only tied to the economies of global resources e.g. mining forestry and agriculture we explore how changing landscapes are planned and designed not to be urban that is to look function and feel different from cities and suburbs in spite of new home development

and real estate speculation The book's authors contend that exurbia is defined by the persistence of rural economies the conservation of rural character and protection of natural ecological systems all of which are critical components of the contentious local politics that seek to limit growth Comparative political ecology is used as an organizing concept throughout the book to describe the nature of exurban areas in the U S and Australia although exurbs are common to many countries The essays each describe distinctive case studies with each chapter using the key concepts of competing rural capitalisms and uneven environmental management to describe the politics of exurban change This systematic analysis makes the processes of exurban change easier to see and understand Based on these case studies seven characteristics of exurban places are identified rural character access local economic change ideologies of nature changes in land management coalition building and land use planning This book will be of interest to those who study planning conservation and land development issues especially in areas of high natural amenity or environmental value There is no political ecology book quite like this neither one solely focused on cases from the developed world in this case the United States and Australia nor one that specifically harnesses different case studies from multiple areas to develop a central organizing perspective of landscape change
