The Heroin Stimulus Implications For A Theory Of Addiction:

The Heroin Stimulus R. E. Meyer, 2012-12-06 The simple fact that the authors were able to give injectable heroin to volunteers for addictive self administration at a Harvard facility may elude the notice it deserves On the other hand research questions centering on whether heroin is linked to a craving for pleasure or relief of pain might raise the transplanted hackles of those who simplistically see scientists as pursuing only transparent trivialities In truth this report is about a historical and pioneering step in clinical research on a major unsolved problem of the biological social psychological roots of addiction The research questions posed are clearly relevant both to the design of effective treatments and treatment policy and to the basic science search that could help our understanding of how addictive drugs capture such powerful control over behavior Heroin was synthesized and has been available along with aspirin for over three quarters of a century Yet with all the tools of Western science and with the enormous and growing social personal and economic costs of world wide heroin use we surprisingly

The Ghost in the Addict Shepard Siegel, 2024-03-05 How withdrawal distress and cravings can haunt current and former addicts and what they can teach us about addiction and its treatments The dead drug leaves a ghost behind At certain hours it haunts the house Jean Cocteau once wrote In *The Ghost in the Addict* Shepard Siegel offers a Pavlovian analysis of drug use Chronic drug use he explains conditions users to have an anticipatory homeostatic correction which protects the addict from overdose

This drug preparatory response elicited by drug paired cues is often mislabeled a withdrawal response. The withdrawal response however is not due to the baneful effects of previous drug administrations rather it is due to the body's preparation for the next drug administration a preparatory response that can haunt addicts like a ghost long after they have conquered their usage. Examining the failure of legislation the circumstances of overdose and the cues that promote drug use Siegel seeks to counter the widespread belief that addiction is evidence of a pathology. Instead he proposes that the addict has an adaptive learned response to the physiological changes wrought by drug use. It is only through understanding so called withdrawal symptoms as a Pavlovian response he explains that we can begin to understand why addicts experience cravings long after their last drug use. *NIDA Research Monograph*, 1976

Comprehensive Handbook of Psychopathology Henry E. Adams, 2013-12-18 The major purpose of this handbook is to provide a comprehensive review of current clinical descriptions research and theories of psychopathology. Descriptive psychopathology is a field that is the foundation of clinical practice and research in clinical psychology psychiatry psychiatric social work psychiatric nursing and allied professions in mental health. Psychopathology is often perceived as a stepchild of the more glamorous areas of diagnosis or assessment and therapy or behavioral change. Nevertheless it is doubtful that any meaningful advancements in these areas will occur until there is a thorough understanding of the behavioral disorders. The purpose of the present project was to devise a handbook that covered both general and specific topics in psychopathology and that would be useful to researchers practitioners and graduate or other advanced students in the mental health professions. In order to implement this plan we selected very carefully colleagues whom we respect for their expertise in particular fields. These include both clinicians and researchers with outstanding national reputations as well as more junior behavioral scientists and clinicians who in our opinion will achieve similar recognition in the future. The chapters in this book lead us to believe that we have chosen wisely. We would like to express our appreciation to these authors for their outstanding contributions and cooperation.
