Catalog of Educational Captioned Films/videos for the Deaf, 1993 *Gender and Fair Assessment* Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience *Books Related to Compensatory Education* , 1969 **Research in Education** , 1968 **The Software Encyclopedia 2000** Bowker Editorial Staff, 2000-05 **Assessing the Common Core: What's Gone Wrong--And How to Get Back on Track** Robert C. Calfee, Kathleen M. Wilson, 2016-02-02 From distinguished educators this book imagines what our schools could look like if an authentic vision of the Common Core State Standards CCSS were put in place and thoughtfully critiques how and why implementation has faltered The authors outline a curriculum framework that focuses on student based inquiry and the use of formative assessment to monitor and guide student learning They provide workable innovative alternatives to the packaged instructional programs and summative tests that have come to be associated with the English language arts ELA standards Vignettes of diverse schools and districts highlight a range of successful approaches to making the CCSS work
