Encyclopedia of American Urban History David Goldfield, 2007 Publisher description

Higher Neal Bascomb, 2004-09-21 The Roaring Twenties in New York was a time of exuberant ambition free flowing optimism an explosion of artistic expression in the age of Prohibition New York was the city that embodied the spirit and strength of a newly powerful America In 1924 in the vibrant heart of Manhattan a fierce rivalry was born Two architects William Van Alen and Craig Severance former friends and successful partners but now bitter adversaries set out to imprint their individual marks on the greatest canvas in the world the rapidly evolving skyline of New York City Each man desired to build the city s tallest building or skyscraper Each would stop at nothing to outdo his rival Van Alen was

a creative genius who envisioned a bold contemporary building that would move beyond the tired architecture of the previous century. By a stroke of good fortune he found a larger than life patron in automobile magnate Walter Chrysler and they set out to build the legendary Chrysler building. Severance by comparison was a brilliant businessman and he tapped his circle of downtown old money investors to begin construction on the Manhattan Company Building at 40 Wall Street. From ground breaking to bricklaying Van Alen and Severance fought a cunning duel of wills. Each man was forced to revamp his architectural design in an attempt to push higher to overcome his rival in mid construction as the structures rose floor by floor in record time. Yet just as the battle was underway a third party entered the arena and announced plans to build an even larger building. This project would be overseen by one of Chrysler's principal rivals a representative of the General Motors group and the building ultimately became known as The Empire State Building. Infused with narrative thrills and perfectly rendered historical and engineering detail Higher brings to life a sensational episode in American history. Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt leading up to an astonishing climax that illustrates one of the most ingenious and secret architectural achievements of all time.

Understanding Tall Buildings Kheir Al-Kodmany, 2017-02-17 In recent years the rapid pace of tall building construction has fostered a certain kind of placelessness with many new tall buildings being built out of scale context and place. By analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire stimulate and engage Understanding Tall Buildings contends that well designed tall buildings can rejuvenate cities ignite economic activity support social life and boost city pride. Although this book does not claim to possess all the solutions it does propose specific tall building design guidelines that may help to promote placemaking. Through this work it is the author's hope that ill conceived developments will become less common in the future and that good placemaking will become the norm not the exception. This book is a must read for students and practitioners working to create better tall buildings and better urban environments.

The Black Skyscraper Adrienne Brown, 2017-11-15 How did writers and artists view the intersection of architecture and race in the modernist era? Winner of the MSA First Book Prize of the Modernist Studies Association. With the development of the first skyscrapers in the 1880s urban built environments could expand vertically as well as horizontally. Tall buildings emerged in growing cities to house and manage the large and racially diverse populations of migrants and immigrants flocking to their centers following Reconstruction. Beginning with Chicago's early 10 story towers and concluding with the 1931 erection of the 102 story Empire State Building Adrienne Brown's The Black Skyscraper provides a detailed account of how scale and proximity shape our understanding of race. Over the next half century as city skylines grew American writers imagined the new urban backdrop as an obstacle to racial differentiation. Examining works produced by writers painters architects and laborers who grappled with the early skyscraper's outsized and disorienting dimensions Brown explores this architecture's effects on how race was seen read and sensed at the turn of the twentieth century. In lesser known works of apocalyptic science fiction light
