*Ve-Ed Ya'aleh (Gen 2:6), Volume 2* Peter Machinist, Robert A. Harris, Nili Samet, Noga Ayali-Darshan, 2021-09-17 Sixty six colleagues friends and former students of Edward L. **The Evolution of Adam** Peter Enns, 2012-01-01 Can Christianity and evolution coexist Traditional Christian teaching presents Jesus as reversing the effects of the Fall of Adam However an evolutionary view of beginnings doesn't allow for a historical Adam making evolution seemingly incompatible with what Genesis and the apostle Paul say about him For Christians who accept evolution and want to take the Bible seriously this presents a faith shaking tension Peter Enns an expert in biblical interpretation offers a way forward by explaining how this tension is caused not by the discoveries of science but by false expectations about the biblical texts Focusing on key biblical passages in the discussion Enns demonstrates that the author of Genesis and the apostle Paul wrote to ask and answer ancient questions for ancient people the fact that they both speak of Adam does not determine whether Christians can accept evolution This thought provoking book helps readers reconcile the teachings of the Bible with the widely held evolutionary view of beginnings and will appeal to anyone interested in the Christianity evolution debate

Schank,2004-04-26 In the author s words This book is an honest attempt to understand what it means to be educated in today s world His argument is this No matter how important science and technology seem to industry or government or indeed to the daily life of people as a society we believe that those educated in literature history and other humanities are in some way better informed more knowing and somehow more worthy of the descriptor well educated This 19th century conception of the educated mind weighs heavily on our notions on how we educate our young When we focus on intellectual and scholarly issues in high school as opposed to issues such as communications basic psychology or child raising we are continuing to rely on outdated notions of the educated mind that come from elitist notions of who is to be educated and what that means To accommodate the realities of today s world it is necessary to change these elitist notions We need to rethink what it means to be educated and begin to focus on a new conception of the very idea of education Students need to learn how to think not how to accomplish tasks such as passing standardized tests and reciting rote facts In this engaging book Roger C Schank sets forth the premises of his argument cites its foundations in the Great Books themselves and illustrates it with examples from an experimental curriculum that has been used in graduate schools and with K 12 students Making Minds Less Well Educated Than Our Own is essential reading for scholars and students in the learning sciences instructional design curriculum theory
