Coming Clean Greg Fox, 2004 Launched in May 2000 DailyConfession.com was created as an outlet where people could confess their sins and unburden their souls in complete anonymity as well as receive honest compassionate responses from fellow Web users As the Web site's popularity grew visiting the site soon became a daily obsession for millions To date DailyConfession.com has logged over 250 000 confessions and two million responses and regularly receives over one million hits each day *Coming Clean* comes directly from the Internet pages of DailyConfession.com In this truly unique collection author and webmaster Greg Fox has compiled the wildest and wackiest confessions and responses posted to the site The confessions are organized into categories loosely based on the Ten Commandments such as That Old Time Religion Urges Obsessions and Fantasies Stop Thief Family Matters and Liar Liar The confessions and responses included range from the serious and truly poignant tales of true love suicide and spiritual waning to the hilariously kooky weird habits alien abductions and naked neighbors Intensely entertaining this book doesn't merely offer gratuitous voyeurism it illuminates some intriguing and surprisingly common aspects of human nature Those who dip into *Coming Clean* are bound to recognize themselves in the pages of this fascinating book

The Slumbering Masses Matthew J. Wolf-Meyer, 2012-09-10 Americans spend billions of dollars every year on drugs therapy and other remedies trying to get a good night's sleep Anxieties about not getting enough sleep and the impact of sleeplessness on productivity health and happiness pervade medical opinion the workplace and popular culture In *The Slumbering Masses* Matthew J. Wolf-Meyer addresses the phenomenon of sleep and sleeplessness in the United States tracing the influence of medicine and industrial capitalism on the sleeping habits of Americans from the nineteenth century to the present Before the introduction of factory shift work Americans enjoyed a

range of sleeping practices most commonly two nightly periods of rest supplemented by daytime naps The new sleeping regimen eight uninterrupted hours of sleep at night led to the pathologization of other ways of sleeping Arguing that the current model of sleep is rooted not in biology but in industrial capitalism's relentless need for productivity The Slumbering Masses examines so called Z drugs that promote sleep the use of both legal and illicit stimulants to combat sleepiness and the contemporary politics of time Wolf Meyer concludes by exploring the extremes of sleep from cases of perpetual sleeplessness and the use of the sleepwalking defense in criminal courts to military experiments with ultra short periods of sleep Drawing on untapped archival sources and long term ethnographic research with people who both experience and treat sleep abnormalities Wolf Meyer analyzes and sharply critiques how sleep and its supposed disorders are understood and treated By recognizing the variety and limits of sleep he contends we can establish more flexible expectations about sleep and ultimately subvert the damage of sleep pathology and industrial control on our lives

Vital and Health Statistics ,1967 **Death** Shelly Kagan,2012-04-24 Examines the myriad of questions that arise when confronting the meaning of mortality challenging many widely held views about death and inviting readers to take a fresh look at the fact that they will die **Our Babies, Ourselves** Meredith Small,1999-05-04 A thought provoking combination of practical parenting information and scientific analysis Our Babies Ourselves is the first book to explore why we raise our children the way we do and to suggest that we reconsider our culture s traditional views on parenting New parents are faced with innumerable decisions to make regarding the best way to care for their baby and naturally they often turn for guidance to friends and family members who have already raised children But as scientists are discovering much of

the trusted advice that has been passed down through generations needs to be carefully reexamined In this ground breaking book anthropologist Meredith Small reveals her remarkable findings in the new science of ethnopediatrics Professor Small joins pediatricians child development researchers and anthropologists across the country who are studying to what extent the way we parent our infants is based on biological needs and to what extent it is based on culture and how sometimes what is culturally dictated may not be what s best for babies Should an infant be encouraged to sleep alone Is breast feeding better than bottle feeding or is that just a myth of the nineties How much time should pass before a mother picks up her crying infant And how important is it really to a baby s development to talk and sing to him or her These are but a few of the important questions Small addresses and the answers not only are surprising but may even change the way we raise our children

Handbook for Those Who Grieve Martin M Auz,2015-02-25 How can I best help someone who has lost a loved one How do I talk to a child about the death of a family member What do I need to think about before I plan a funeral Confusion bewilderment and a lack of direction commonly surface in the aftermath of a death It s also the time when dealing with the issues and emotions of the experience can lead to making hasty or unwise decisions In this revised edition of Handbook for Those Who Grieve Martin M Auz and Maureen Lyons Andrews offer concise practical topic based lists and suggestions to help people immediately after a loss Rather than philosophizing theologizing or rationalizing the authors draw on their research and personal experiences to provide short but solid answers to help grieving people successfully deal with the countless issues and varied emotions that a person s death is sure to thrust upon them

Raised by Animals Jennifer L. Verdolin,2023-09-22 When it comes to family matters do humans know best Leading animal behaviorist Dr Jennifer Verdolin argues otherwise in this eye opening book Welcome to the wild world of raising a family in the animal kingdom sometimes shocking often ingenious Every species can surprise us Chimps have a knack for minimizing temper tantrums and owl chicks have a remarkable gift for sharing A prairie vole knows exactly when his stressed out partner needs a massage And anyone who considers reptiles cold blooded should consider the caecilian a snakelike animal from Kenya After laying eggs the mother grows a fatty layer of skin which her babies eat after hatching not one of the book s many lessons from the wild to be tried at home Along the way Verdolin challenges our often counterproductive beliefs about what families ought to be like and how we should feel By finding common ground with our furry feathered and even slimy cousins we can gain new insight on what natural parenting really means and perhaps do a better job of forgiving ourselves for those days when we re only human

The Challenges of Gifted Children Barbara Klein,2015-08-18 Educating and raising gifted children presents highly specific challenges This book explains how parents can learn to optimize their child s potential and work with schools spouses friends and specialists to create a nurturing and stable life Having a gifted child is a joy but it is also one of the greatest challenges of parenthood to help that child find the right fit for education In this remarkably insightful text noted psychologist Barbara Klein PhD EdD explains the emotional and social issues of giftedness identifies parental actions

and reactions that can exacerbate or soothe the challenges and describes how these key factors tie in to identifying the best school and educational program to enable a gifted child to achieve his or her goals and maximize success The text includes many vignettes from children and families who have sought guidance across 30 years from the author an accomplished psychotherapist recognized as a national authority on raising gifted children This single volume work presents an understandable theoretical overview of the psychological problems parents face raising their gifted child and clearly explains why the parent child interaction can be so intense and stressful a reality that is rarely acknowledged in the existing literature on giftedness Parents of gifted children will learn how to make decisions about their children s social emotional development and educational future and understand how their actions can be helpful or harmful to their gifted child and his her education Educators will fully grasp why and how gifted kids are different and why they need different educational environments while mental health professionals will gain insight into their gifted patients emotional struggles And gifted individuals will realize that others experience similar struggles

Sleep and Health Michael A. Grandner, 2019-04-17 Sleep and Health provides an accessible yet comprehensive overview of the relationship between sleep and health at the individual community and population levels as well as a discussion of the implications for public health public policy and interventions Based on a firm foundation in many areas of sleep health research this text further provides introductions to each sub area of the field and a summary of the current research for each area This book serves as a resource for those interested in learning about the growing field of sleep health research including sections on social determinants cardiovascular disease cognitive functioning health behavior theory smoking and more Highlights the important role of sleep across a wide range of topic areas Addresses important topics such as sleep disparities sleep and cardiometabolic disease risk real world effects of sleep deprivation and public policy implications of poor sleep Contains accessible reviews that point to relevant literature in often overlooked areas serving as a helpful guide to all relevant information on this broad topic area

Evolution, Early Experience and Human Development Darcia Narváez, 2012-11-29 The field of cognitive psychology has expanded rapidly in recent years with experts in affective and cognitive neuroscience revealing more about mammalian brain function than ever before In contrast psychological problems such as ADHD autism anxiety and depression are on the rise as are medical conditions such as diabetes obesity and autoimmune disorders Why in this era of unprecedented scientific self knowledge does there seem to be so much uncertainty about what human beings need for optimal development Evolution Early Experience and Human Development asserts that human development is being misshaped by government policies social practices and public beliefs that fail to consider basic human needs In this pioneering volume scientists from a range of disciplines theorize that the increase in conditions such as depression and obesity can be partially attributed to a disparity between the environments and conditions under which our mammalian brains currently develop and our evolutionary heritage For example healthy brain and emotional development depends to a significant extent upon caregiver availability and quality of care These include

practices such as breastfeeding co sleeping and parental social support which have waned in modern society but nevertheless may be integral to healthy development As the authors argue without a more informed appreciation of the ideal conditions under which human brains minds develop and function human beings will continue to struggle with suboptimal mental and physical health and as problems emerge psychological treatments alone will not be effective The best approach is to recognize these needs at the outset so as to optimize child development Evolution Early Experience and Human Development puts forth a logical empirically based argument regarding human mammalian needs for optimal development based on research from anthropology neurobiology animal science and human development The result is a unique exploration of evolutionary approaches to human behavior that will support the advancement of new policies new attitudes towards health and alterations in childcare practices that will better promote healthy human development **Gender And**

Ageing: Changing Roles And Relationships Arber, Sara, Davidson, Kate, Ginn, Jay, 2003-11-01 This text emphasizes changing gender roles and relationships gender identity and an examination of masculinities in midlife and later life It covers the need to reconceptualize partnership status in order to understand the implications of both widowhood and divorce for older women and men The Ise Stories , 2010-07-31 Ise monogatari is one of classical Japan s most important texts It influenced other literary court romances like The Tale of Genji and inspired artists playwrights and poets throughout Japanese history and to the present day In a series of 125 loosely connected episodes the Ise tells the story of a famous lover Captain Ariwara no Narihira 825 880 and his romantic encounters with women throughout Japan Each episode centers on an exchange of love poems designed to demonstrate wit sensitivity and courtliness Joshua Mostow and Royall Tyler present a fresh contemporary translation of this classic work together with a substantial commentary for each episode The commentary explores how the text has been read in the past and identifies not only the point of each episode but also the full range of historical interpretations many of which shaped the use of the Ise in later literary and visual arts The book includes reproductions from a version of the 1608 Saga bon printed edition of the Ise the volume that established Ise iconography for the entire Edo period 1600 1868
