Social Fabric:

The Social Fabric of the Networked City Géraldine Pflieger, 2008-01-01 Constructed around the work of Manuel Castells on the space of places the space of flows and the networked city nine contributors focus on the transformation of the fabric of the networked city in terms of policies and social practices *The Social Fabric: American life from 1607 to 1877* John H..

Cary, 1995 **The Social Fabric** John H. Cary, 1987 *Architecture and Leadership* Mark Roberson, Alicia Crumpton, 2022-12-12 From cathedrals to cubicles people go to great lengths and expense to design their living and working environments They want their spaces to be places where they enjoy being reflecting who they are and what they care about The resultant environments in turn become loud albeit unvocal leaders for people occupying those corresponding spaces The design and use of work and living spaces typifies and thematizes expectations for the group Essentially the architecture of rooms buildings and cities creates cultures by conveying explicit and implicit messages This is evident when people approach and walk into St Basil's Cathedral in Moscow the Forbidden City in Beijing the Sydney Opera House in Sydney Australia the Jewish Museum in Berlin or the Rothko Chapel in Houston to name some examples While leaders oftentimes lack the resources to have their spaces mirror the greatest architectural achievements of the world they are in a position to use the art and science of architecture at whatever scale is available to their advantage The creative and intentional use of space and place advances and promotes cherished values and enhances organizational effectiveness This book explores the essence of good architecture and establishes relevant connections for leaders and managers to strategically design and use the organizational workplace and space to support their mission and purpose and create aesthetically meaningful work environments It equips leaders to be culturally astute on what defines good architecture and to incorporate principles of beauty in their leadership practices accordingly and will be of interest to researchers academics professionals and students in the fields of leadership organizational studies and architecture theory and practice **The Social Fabric** James F. Short, Jr., 1986-06 Composed of papers presented at the 1984 meeting of the American Sociological Association The Social Fabric addresses the question how is the social order possible Presenting research and theory regarding the nature of social order and social processes and the contexts in which social life takes place this volume examines the most fundamental issues of social science The contributors also put forward bold proposals for improving the nature of social life and apply these new insights to such problems as the nuclear arms issue and world war *The Social Fabric* John Henry Cary, 1978

Lee,2017-11-20 Microeconomic Theory A Heterodox Approach develops a heterodox economic theory that explains the economy as the social provisioning process at the micro level Heterodox microeconomics explores the economy with a focus on its constituent parts and their reproduction and recurrence their integration qua interdependency by non market and market arrangements and institutions and how the system works as a whole This book deals with three theoretical concerns Due to the significance of the price mechanism to mainstream

economics a theoretical concern of the book is the business enterprise markets demand and pricing Also since heterodox economists see private investment consumption and government expenditures as the principal directors and drivers of economic activity a second theoretical concern is business decision making processes regarding investment and production government expenditure decisions the financing of investment the profit mark up and the wage rate and taxes Finally the third theoretical concern of the book is the delineation of a non equilibrium disaggregated price output model of the social provisioning process This book explores the integration of these various theories with a theoretical model of the economy and how this forms a theory that can be identified as heterodox microeconomics It will be of interest to both postgraduates and researchers

Storytelling in Organizations Laurence Prusak,Katalina Groh,Stephen Denning,John Seely Brown,2012-06-14 This book is the story of how four busy executives from different backgrounds and different perspectives were surprised to find themselves converging on the idea of narrative as an extraordinarily valuable lens for understanding and managing organizations in the twenty first century The idea that narrative and storytelling could be so powerful a tool in the world of organizations was initially counter intuitive But in their own words John Seely Brown Steve Denning Katalina Groh and Larry Prusak describe how they came to

see the power of narrative and storytelling in their own experience working on knowledge management change management and innovation strategies in organizations such as Xerox the World Bank and IBM Storytelling in Organizations lays out for the first time why narrative and storytelling should be part of the mainstream of organizational and management thinking This case has not been made before The tone of the book is also unique The engagingly personal and idiosyncratic tone comes from a set of presentations made at a Smithsonian symposium on storytelling in April 2001 Reading it is as stimulating as spending an evening with Larry Prusak or John Seely Brown The prose is probing playful provocative insightful and sometime profound It combines the liveliness and freshness of spoken English with the legibility of a ready friendly text Interviews with all the authors done in 2004 add a new dimension to the material allowing the authors to reflect on their ideas and clarify points or highlight ideas that may have changed or deepened over time
