School as a community Hans Passenier, 2024-02-08 In search of leadership in Waldorf schools Leadership in Waldorf schools has a specific history Whereas 40 years ago it was hardly allowed to formally exist because it represented power and hierarchy now it is commonplace to have a headmaster rector or director In this book Hans Passenier examines the development of leadership and organisation in Waldorf schools He starts at the origins and finds principles that can help develop school organisations and their leadership in the future In four parts he unfolds the foundations the tools to develop leadership and organisations and finally describes exercises to support that development as a school community His thesis is that education is about children being diverse having different abilities Also that the educator should not be a carpenter but a gardener The image of the school as an organism is guiding in which the school community is a place for the inner development of each individual in that school community The horizontal and vertical dimensions guide the view of both leadership and organisational design
