shaping the life of individuals and groups as well as being responsible for the dynamics of social development is shown to be as modern as any other industrialized society definitely distinct though are the ways in which institutions are defined and organised as a result of different social and historical roots of the process of modernization Aspects of Social Change in Modern Japan Ronald Philip Dore, 2015-03-08 This is an examination of the consequences of Japan's rapid industrialization upon interpersonal relations Based upon current theories of Western experiences with modernization these studies show that the Eastern changes do not conform to Western patterns Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Single Mothers in Contemporary Japan Aya Ezawa, 2016-05-12 Combining work and family remains a major challenge for married women in contemporary Japan and it is not uncommon for them to quit working when starting a family Single mothers by contrast almost always work regardless of the age of their children Despite their eagerness to support themselves and their children through employment their average income remains low and many live on a household budget close to the poverty line This book examines how the difficult living conditions facing single mothers in Japan highlight not only the challenges they face in earning a family wage and managing the work family balance but also reveals the class dimensions of family life in contemporary Japan The need to make ends meet with few resources means that mothers may find it difficult to uphold the lifestyle they may consider as most appropriate for the upbringing of their children and that they may have to choose between their presence at home in line with the ideal of the middle class housewife and mother or devoting more time to earning an income that can pay for a good education Social class in this case is not just a matter of education occupation or income but is also expressed by mothers approaches to their children's upbringing and future opportunities in education and employment Based on life history interviews with single mothers this study examines the gendered meanings of social class and social achievement and the role of maternal practices in shaping their children's future life trajectories

Images Of Japanese Society Hb Ross Mouer, Yoshio Sugimoto, 2013-10-28 The popular image of Japanese society is a stereotypical one that of a people characterised by a coherent set of thought and behaviour patterns applying to all Japanese and transcending time Ross Mouer and Yoshio Sugimoto found this image quite incongruous during their research for this book in Japan They ask whether this stereotype of the Japanese is not only generated by foreigners but by the Japanese themselves This is likely to be a controversial book as it does not contribute to the continuing mythologising of Japan and the Japanese The book examines contemporary images of Japanese society by surveying an extensive sample of popular and academic literature on Japan After tracing the development of holistic theories about the Japanese commonly referred to as the group model attention is focused on the evaluation of that image Empirical evidence contrary to this model is discussed and methodological lacunae are cited A sociology of Japanology is also presented In pursuit of other visions of Japanese society the authors argue that certain aspects of Japanese behaviour can be explained by considering Japanese society as the exact inverse of the portrayal provided by the group model The authors also present a multi dimensional model of social stratification arguing that much of the variation in Japanese behaviour can be understood within the framework as having universal equivalence

Social Stratification in an Aging Society with Low Fertility Sawako Shirahase, 2022-08-31 This edited book empirically discusses stratification in contemporary Japanese society It is unique for its examination of social inequality in relation to declining fertility and an aging population Japan is the most aged society in the world according to the Statistics Bureau of Japan people who are aged 65 and above comprised 29.1% of the country's total population in 2021 Meanwhile the fertility rate has continuously declined since the mid 1970s Japan experienced a dramatic change in its demographic structure in a short period of time Such fast change could be a major factor that generated social stratification In her industrialization Japan was thought to share a pattern of social stratification similar to that of developed European and North American countries but with a low

degree of socio economic inequality and a high degree of homogeneity There is no clear support for this description of Japan although the country does share a pattern and degree of social stratification similar to that observed in Europe and North America The social stratification theory has been developed in close relationship to the labor market however it is necessary to further examine the social stratification of very aged societies in which a substantial number of the population namely retired persons no longer have any ties to the labor market In this book the contributors explore the pattern of social stratification at three life stages young middle aged and elderly Included are discussions of various aspects of stratification such as education work wealth marriage family gender generation and social attitudes
