Aging in the Third World Kevin G. Kinsella, 1988

Aging and Adult Development in the Developing World

Frank E. Eyetsemitan, James T. Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies. The developed world however is experiencing a surge in the elderly population and this has spurred its study. There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies. In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world. The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical, psychological and social aspects of aging, death and dying and social and public policies. Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world, the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant.

An Aging India Phoebe S. Liebig, S. Irudaya Rajan, 2013-12-19 Explore Indian policy and practice on aging from a variety of perspectives. This pathbreaking collection provides something that has been missing in the literature on aging in India especially for non Indian audiences: studies of various aspects of aging in India combined with analyses of current policies, policy trends and recommendations. You will examine aging issues from a variety of perspectives: demographic foundations, social and family relations, economics, health and disability, current interventions and advocacy and policy. An Aging India also provides you with up to date references, explanations of differences and similarities within India's diverse population, examples of programs in various settings including a geriatric hospital, a major NGO and old age homes and an overview of the development of India's national policy on aging. Where appropriate, comparisons with U.S. policy approaches are noted. An Aging India: Perspectives, Prospects and Policies examines the demography of aging in India, the current state of research on aging and the pitfalls associated with that research, income, poverty and the problems created by the lack of any widespread retirement income system in India, the health status of Indian elders and what their healthcare prospects are, the situation for the disabled elderly in India, elder abuse in the Indian context, social networks and grassroots organizations for seniors in India, the role of Indian geriatric hospitals and old age homes. The insights of the top researchers and practitioners who contributed to An Aging India: Perspectives, Prospects and Policies will strike home with their counterparts around the world. Make this book a part of your professional teaching collection today.

Work and Caring for the Elderly Viola M. Lechner, Margaret B. Neal, 1999 *Work and Caring for the Elderly* directly addresses the pressing issues of this worldwide dilemma by examining how 11 geographically dispersed countries in various stages of economic and social development are responding to this challenging problem.

Old-Age Security in Comparative Perspective John B. Williamson, Fred C.

Pampel,1993-03-11 This work makes extensive use of seven well developed historical case studies describing the evolution of public old age security in industrial nations Germany United Kingdom Sweden and the United States and developing nations Brazil Nigeria and India The authors focus on specifying contexts in which general theoretical perspectives can be used to account for these developments One of the few studies which integrates historical and quantitative data this accessible work will prove helpful to students and researchers of the welfare state aging policy and comparative sociology Social Policies for the Elderly in the Third World Martin Tracy,1991-01-30 This book introduces a problem solving model to cross national studies of social programs for the elderly in economically developing nations the Third World a term that is used here only as a designation of unspecified relatively lower levels of industrial and economic development Current models of cross national analysis tend to focus on theory testing and description they fail to provide the practical information that indigenous policymakers need to decide whether another nation s policy program or provision is appropriate to their own country

This volume presents a new perspective on demographic transition economic growth and national development via exploration of the Third World economies It provides a multidimensional approach to the close relationship between the concept of the chaos and complexity theory and provides a deliberate glance into the plight of policy formulation for demographic transition economic growth and development of Third World countries The volume discusses the efficiency of good strategies and practices and their impact on business growth and economic growth depending on the depth and diversity of infrastructure sector in particular and overall socioeconomic development in general Economic Growth and Demographic Transition in Third World Nations A Chaos and Complexity Theory Perspective covers a conglomeration of various aspects and issues related to the effect of demographic transition on socio economic development in Third World countries especially in the post globalized era It focuses on the applicability of the chaos and complexity theory in order to elicit transformational policies and aims to discuss and predict future projections of the new world of the economic growth policies Critical Perspectives on Aging Meredith Minkler, Carroll Estes, 2020-11-25 This unique volume brings together 20 critical essays on aging within the context of the broad social political and economic factors that help shape and determine the realities of growing old Rather than viewing aging in isolation it explores the social creation of old age dependency and the profound influence of race gender and social class on what it means to grow old It looks too at such topics as the biomedicalization of aging the role of business and the media in changing societal images of the old the fact and fiction behind senior power the multibillion dollar nursing home industry and the role of advanced capitalist nations in creating economic dependency among elders in the Third World Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new

opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
