Social Problems The Search For Solutions An Anthology:

Social Problems--the Search for Solutions Frank R. Scarpitti, 1994 **Science, Technology and Society** Wenceslao J. González, 2005

The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past. It is a social turn which affects philosophy of science as well as philosophy of technology. It includes a new vision of the aims, processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant. This turn highlights science and technology as social undertakings rather than intellectual contents. According to this new vision there are several important changes as to what should be studied, the objects of research, how it should be studied, the method and what the consequences for those studies are. The new focus of attention can be seen in many changes and among them are several of special interest:

- a from what science and technology are in themselves, mainly epistemic contents, to how science and technology are made, largely social constructions;
- b from the language and structure of basic science to the characteristics of applied science and the applications of science;
- c from technology as a feature through which human beings control their natural surroundings, a step beyond technics, due to the contribution of science to technology as a social practice and an instrument of power; and
- d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values: cultural, political, economic of science and technology.

Wenceslao J. Gonzalez is professor of logic and philosophy of science at the University of A Coruña, Spain. He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University. He has been a visiting researcher at the Universities of St Andrews, Manchester and London, London School of Economics as well as Visiting fellow at the Center for Philosophy of Science, University of Pittsburgh. He has given lectures at the Universities of Pittsburgh, Stanford, Quebec and Helsinki. The conferences in which he has participated include those organized by the Universities of Uppsala, New South Wales, Bologna and Canterbury, New Zealand. He has edited 20 volumes and published 70 papers. He is the editor of the monographic issues on Philosophy and Methodology of Economics, 1998, and Lakatos's Philosophy Today, 2001. His writings include: Economic Prediction and Human Activity: An Analysis of Prediction in Economics from Action Theory, 1994; On the Theoretical Basis of Prediction in Economics, 1996; Rationality in Economics and Scientific Predictions: A Critical Reconstruction of Bounded Rationality and its Role in Economic Predictions, 1997; Lakatos's Approach on Prediction and Novel Facts, 2001; Rationality in Experimental Economics: An Analysis of R. Selten's Approach, 2003; From Erklären/Verstehen to Prediction/Understanding: The Methodological Framework in Economics, 2003; and The Many Faces of Popper's Methodological Approach to Prediction, 2004.

On Anthologies Jeffrey R. Di Leo, 2004-01-01

Over the course of the past twenty

five years anthologies have shifted from playing a relatively minor role in academic culture to a position of dominance. The essays in this collection explore the significant intellectual, economic, political, pedagogical, and creative resonance of anthologies through all levels of academic life. They show that anthologies have consequences and are grounded in commitments. Striving to articulate these consequences and commitments is a priority in higher education today. Most of the contributors to this volume are editors of anthologies and they draw on personal experiences to provide a rare glimpse into the economics and logic of anthology publication. Their essays illustrate the ways in which editing an anthology involves negotiation and compromise between intellectual ideal and realistic practice. *On Anthologies* includes discussion of a wide range of anthologies used and produced by teachers and scholars. Though the emphasis is on literature and theory, anthologies, the insights in this volume speak to professionals in all areas of academic life. Collectively, these essays establish the foundation for continuing critical analysis of anthology production and consumption in all disciplines.
