## **Social Reconstruction Through Education The Philosophy History And Curricula Of A Radical Idea:**

*Social Reconstruction Through Education* Michael E. James, 1995 This volume on the history and philosophy of social reconstruction is the result of Kenneth Benne's discussions, essays and experiences but also includes contributions from other scholars. Each of the essays study the movement as a way of grappling with the critical issue of the relationship between education and social change and each chapter intends to stimulate, broaden and enrich the legacy of what contributing author James Giarelli calls a public philosophy of education. The volume also connects past to present thus bringing the reader fresh insight into the dilemmas facing schooling in the 1990s.

## **Handbook of Research in the Social Foundations of Education**

Steven Tozer, Bernardo P. Gallegos, Annette Henry, Mary Bushnell Greiner, Paula Groves Price, 2011-07-05 Parts one and two of this volume present the theoretical lenses used to study the social contexts of education. These include long established foundations disciplines such as sociology of education and philosophy of education as well as newer theoretical perspectives such as critical race theory, feminist educational theory and cultural studies in education. Parts three, four and five demonstrate how these theoretical lenses are used to examine such phenomena as globalization, media, popular culture, technology, youth culture and schooling. This groundbreaking volume helps readers understand the history, evolution and significance of this wide ranging, often misunderstood and increasingly important field of study. This book is appropriate as a reference volume not only for scholars in the social foundations of education but also for scholars interested in the cultural contexts of teaching and learning, formal and informal. It is also appropriate as a textbook for graduate level courses in Social Foundations of Education, School and Society, Educational Policy Studies, Cultural Studies in Education and Curriculum and Instruction.

The Social Frontier Eugene F. Provenzo, 2011 The Social Frontier is the most interesting and important educational journal to emerge from the Great Depression. First published in 1934 by a group of scholars at Teachers College, Columbia University that included George Counts and William Heard Kilpatrick, the magazine represented a conscious act of social and political reconstruction. With a strong collectivist orientation, the magazine was widely misperceived as communist in its approach. In fact, its editorial position called for a greater social role for teachers and a more just and equitable system of schooling. The magazine, which was published for a total of nine years, included articles by major educational and social thinkers of the period from John Dewey to Robert Hutchins and Harold Rugg. Within months of the magazine's first issue, it came under attack by right wing political groups, particularly the *Hurst* newspaper chain. *The Social Frontier: A Critical Reader* provides a selection of the most interesting and historically important articles from the magazine with a comprehensive introduction and critical commentaries on the selected articles which are as timely today as they were when first published seventy five years ago.
