Methodological Practices in Social Movement Research Donatella della Porta, 2014-09-25 Social movement studies have grown enormously in the last few decades spreading from sociology and political science to other fields of knowledge as varied as geography history anthropology psychology economics law and others With the growing interest in the field there has been also an increasing need for methodological guidance for empirical research This volume addresses this need by introducing the main methods of data collection and data analysis as they have been used in past research on social movements Unlike other volumes the book offers a practical how to approach and not simply a review of the methodological literature Each author writes on a method they are very familiar with having used it extensively in their own work And each chapter presents specific discussions on every stage of research from research design to data collection and the use of the information gathered Throughout research dilemmas and choices are presented illustrated and discussed The volume offers an essential point of references for anyone undertaking research on social movements Researching Violently Divided Societies Marie Smyth, Gillian Robinson, 2001-11-20 All societies are to a certain extent divided by conflicts over race ethnicity religion and class However in societies such as Britain and the United States these tensions are contained and managed by social economic and political mechanisms This book produced as a result of an international collaboration between researchers in Eastern Europe Africa the Middle East Northern Ireland and elsewhere aims to Provide a guide to the issues faced by researchers working in violently divided contexts Document the insights and practice wisdom of practising researchers operating in such contexts Afford access to the lived experience of those researchers and the ethical and methodological challenges which face them Present accounts and analysis which illustrate a wide range of diverse experiences and perspectives on the experience of doing research in violently divided societies Explore the involvement of the researchers with the research material and the impact of doing the research on them A range of ethical and methodological issues are covered and the specific demands of conducting research in war torn and divided societies has stimulated the contributors to analyse and critique issues such as the contribution of research to society the benefit of research to respondents and issues of objectivity issues of concern to all researchers However in the often stark circumstances in which the contributors work these issues take on an urgency and clarity that can potentially illuminate research practice generally The book deals with the methodological and ethical issues arising when researching conflicts in violently divided societies where there is no consensus about policing law and order the impartiality of the state or indeed about the legitimacy of the state itself With contributions from researchers who have worked in a range of very different divided societies around the world it examines the conditions under which such inquiry is conducted and looks at the obstacles that researchers face Researching Violently Divided Societies looks in detail at different case studies to offer a sound understanding of the most effective methodological approaches for improving responses to division and violence Chapters cover the role and function of research in divided societies in Africa the efficacy of research in Northern Ireland

dilemmas of identification and ethnography research by insiders and outsiders research for empowerment in Cambodia the role of research in managing conflicts in Nigeria researching ethnic conflict in Post Soviet central Asia a first time researcher's experience in Bosnia the ethics of psychiatric research in war zones and a final comparison of policy **Bibliographie Internationale de Sociologie 1980** ,1982 Each Bibliography lists and annotates the most important works published during the year They are arranged by topic and indexed by author subject and geographic location *Social Research* Tim May,2001-09 May examines the research process in general and aspects of its practice in particular in order to bridge the gap between theory and methods This expanded edition incorporates the latest developments in social research **Code of Federal Regulations** ,1950 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries
