Furner, 1993-06-25 The State and Social Investigation in Britain and the United States addresses the historical development of the knowledge base upon which the public policies of the democratic state depend This comparative study stretches from the Enlightenment origins of the impulse to base legislation on scientific knowledge to the twentieth century development of specialised institutions and professions engaged in social investigation and public policy making It probes investigators biases and omissions as well as their strengths as factors shaping social learning It illuminates the vital link between social empiricism and the late nineteenth century emergence of the New Liberalism in both Britain and the United States And it ponders the impact on social investigation and social policy today of relativism antistatism devolution and privatisation as these currents have developed in both societies since the 1970s

Michael Young, Social Science, and the British Left, 1945-1970 Lise Butler, 2020-09-02 In post war Britain left wing policy maker and sociologist Michael Young played a major role in shaping British intellectual political and cultural life using his study of the social sciences to inform his political thought In the mid twentieth century the social sciences significantly expanded and played a major role in shaping British intellectual political and cultural life Central to this intellectual shift was the left wing policy maker and sociologist Michael Young As a Labour Party policy maker in the 1940s Young was a key architect of the Party's 1945 election manifesto *Let Us Face the Future* He became a sociologist in the 1950s publishing a classic study of the East London working class *Family and Kinship in East London* with Peter Willmott in 1957 which he followed up with a dystopian satire *The Rise of the Meritocracy* about a future society in which social status was determined entirely by intelligence Young was also a prolific social innovator founding or inspiring dozens of organisations including the Institute of Community Studies the Consumers Association Which magazine the Social Science Research Council and the Open University Moving between politics social science and activism Young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions This book examines the relationship between social science and public policy in left wing politics between the end of the Second World War and the end of the first Wilson government through the figure of Michael Young Drawing on Young's prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key Labour values like full employment and nationalisation and to argue that the Labour Party should put more

emphasis on relationships family and community Showing that the social sciences were embedded in the project of social democratic governance in post war Britain it argues that historians and scholars should take their role in British politics and political thought seriously

What Has Sociology Achieved? Henk A. Becker, Christopher G.A. Bryant, 2016-07-27 In an age when continued financial and other support for teaching and research in sociology cannot be taken for granted sociologists have been surprisingly slow to provide a clear statement of the achievements of sociology in the western world since 1950 What Has Sociology Achieved does this by assembling twelve essays specially commissioned from distinguished authors to which the editors add an introduction setting out the issues and a concluding chapter which draws together recurrent themes

The Social Scientific Gaze Per Wisselgren, 2016-02-24 The social sciences have ever since they were first established as academic disciplines played a foundational role in most spheres of modern society in policy making education the media and public debate and hence also indirectly for our self understanding as social beings The Social Scientific Gaze examines the discursive formation of academic social science in the historical context of the social question that is the protracted and wide ranging discussions on the social problems of modernity that were being debated with increased intensity during the nineteenth century Empirically the study focuses on the Lönner Foundation a combined private funding agency and early research institute which was set up in 1885 to promote the rise of Swedish social science and to investigate the social question Comprising an heuristic case the close analysis of the Foundation makes it possible not only to reconstruct its basic ideas and practices but also to situate its activities in broader historical and sociological context The Social Scientific Gaze argues that the rise of Swedish social science may be seen not only as an answer to the social question but also as one attempt alongside others including contemporary social literature the philanthropic reform movement and the introduction of modern social policy to conceptualize mobilize and regulate the social sphere In this process it is furthermore shown how an ambiguous yet distinct social scientific gaze was discursively articulated

Evidence-Based Policymaking Karen Bogenschneider,Thomas Corbett,2011-01-11

This book is for those who believe that good government should be based on hard evidence and that research and policy ought to go hand in hand Unfortunately no such bond exists Rather there is a substantial gap some say chasm between the

production of knowledge and its utilization Despite much contrary evidence the authors propose there is a way of doing public policy in a more reflective manner and that a hunger for evidence and objectivity does exist The book is pragmatic drawing on advice from some of the best and brightest informants from both the research and policy communities In their own voices researchers provide incisive analysis about how to bridge the research policy divide and policymakers provide insights about why they use research what kind is most useful where they seek it and how they screen its quality The book breaks through stereotypes about what policymakers are like and provides an insiders view of how the policy process really works Readers will learn what knowledge skills approaches and attitudes are needed to take research findings from the laboratory to lawmaking bodies and how to evaluate one s success in doing so The book s balance between theory and practice will appeal to students in graduate and upper level undergraduate courses in family studies and family policy educational policy law political science public administration public health social work and sociology This book will also be of interest to researchers who want to bring their ideas into policy debate and to those who work with policymakers to advance an evidence based policy agenda

social problems It considers the critical role of the media in advancing public understanding of social issues and examines important advances in the community indicators movement and international social reporting Eye opening and compelling the book is a provocative centerpiece for policy debates and national initiatives on today s crucial domestic concerns
