Social Structure And Behavior Essays In Honor Of William Hamilton Sewell Studies In Population:

Social Structure and Behavior, 1982 Social psychological aspects of schooling and achievement Social stratification and mobility Measurement and method Social structures and well being The Madison study of the development of health orientations and behavior *Social Structure and Behavior* Robert M. Hauser, David Mechanic, Archibald O. Haller, 2013-09-17 Social Structure and Behavior Essays in Honor of William Hamilton Sewell is a collection of 16 essays dealing with the social psychological aspects of schooling and achievement social stratification and mobility measurements and methods and social structures and wellbeing The collection discusses the political dimension of stratification the results of observation of first graders in their reading group assignments against their social background and stereotyping practices held by dominant groups of society Another papers use a causal model to analyze occupational status and earnings of Cuban exiles in the U S other authors discuss the effects of institutionalization of formal employment in Brazil and propose a revision of the Duncan Scale by a more comprehensive set of occupational prestige scale The book also analyzes measurements of ranked preferences using a single latent factor behind the ranked items One authors points that some sociological terms can be misleading in propounding a sound theory when these terms themselves confound what they are supposed to correlate The text also addresses the fundamental problems concerning welfare that include order collective action and consensus This collection of essays can interest social workers sociologists psychologists and researchers involved in community development The Methodology of Political Economy J.I. Bakker, 2015-12-24 The importance of the global rural urban matrix is often overlooked due to urban normativity But sometimes agrarian populism and a pastoral rural imaginary result in the equally fallacy of a rural normativity as in Jeffersonian nostalgia for a lost way of life that never existed The nature of rurality in North America is important to study but as Alessandro Bonanno makes clear we cannot limit ourselves to the study of one or two nation states We must take a global perspective when it comes to the bio physical environment and the nature of the world capitalist system This collection takes such a perspective The editor frames the contributions with a Meta Paradigm called the New Political Economy Perspective NPEP and explains the roots of that approach in Classical Political Economy and the Canadian Political Economy Tradition of Harold Adams Innis There are chapters by an anthropologist a geographer two generalist sociologists and a group of rural sociologists There is also a chapter on psychiatry and mental health and another chapter which discusses pedagogy The use of an inter disciplinary framework to study global issues makes this a stimulating book which provides a window on issues that are often overlooked

Racial and Cultural Minorities George Eaton Simpson, J. Milton Yinger, 2013-06-29 We need scarcely note that the topic of this book is the stuff of headlines Around the world political economic educational military religious and social relations of every variety have a racial or ethnic component One cannot begin to understand the history or contemporary situation of the United States the Soviet Union China Zimbabwe South Africa Great Britain Lebanon Mexico Canada indeed almost any land without careful attention to the influence of cultural and racial divisions Preparation of this new edition has brought a strong sense of déjà vu with regard both to the persistence of old patterns of discrimination even if in new guises and also to the persistence of limited and constraining explanations We have also found however rich new empirical studies new theoretical perspectives and greatly expanded activity and analyses from members of minority groups Although this edition is an extensive revision with reference both to the data used and the theoretical approaches examined we have not shifted from our basically analytical perspective We strongly support efforts to reduce discrimination and prejudice but these can be successful only if we try to understand where we are and what forces are creating the existing situation We hope to reduce the tendency to use declarations and condemnations of other persons actions as substitutes for an investigation of their causes and consequences
